Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Milton, Massachusetts, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Town of Milton, Massachusetts's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Milton, Massachusetts, as of June 30, 2018, and the respective changes in financial position and, where applicable, cash flows, thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Governmental Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 21, 2018, on our consideration of the Town of Milton, Massachusetts' internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Management's Discussion and Analysis

Management's Discussion and Analysis

As management of the Town of Milton, we offer readers of the Town of Milton's financial statements this narrative overview and analysis of the financial activities of the Town of Milton for the year ended June 30, 2018. We encourage readers to consider the information presented in this report. All amounts, unless otherwise indicated, are expressed in whole dollars.

Financial Highlights

- The assets and deferred outflows of resources of the Town of Milton exceeded its liabilities and deferred inflows of resources at the close of the most recent year by \$33.7 million (net position).
- The total governmental net position increased by \$922,000.
- As required by GASB Statement #68, in 2018 the Town recognized their total net pension liability of \$16.3 million along with a deferred outflow and inflow related to pensions of \$4.5 million and \$10.2 million, respectively.
- Beginning net position of the governmental activities and business-type activities have been revised to reflect the implementation of GASB Statement #75, "*Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*". The implementation of this standard required the calculation of the OPEB liability to be revised due to the use of different methods and assumptions as previously required by GASB Statement #45, "*Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*". Accordingly, the Town's Net position as of June 30, 2017, has been revised to reflect these changes. See note 15 for additional information.
- As of the close of the current year, the Town of Milton's governmental funds reported combined ending fund balances of \$31.2 million, an increase of \$6.8 million in comparison with the prior year. The increase is attributable primarily to the timing of capital expenditures funded by bonds proceeds as well \$5.5 million of proceeds received from the sale of real estate willed to the Town by a long time resident. The funds from the sale will be used to help underprivileged families within the community.
- At the end of the current year, unassigned fund balance for the general fund was \$7.3 million or 6.6% of total general fund budgetary expenditures.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Town of Milton's basic financial statements. The Town of Milton's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This approach focuses on both the Town as a whole (government-wide) and the fund financial statements. The government-wide financial statements provide both long-term and short-term information about the Town as a whole. The fund financial statements focus on the individual parts of the Town government, reporting the Town's operations in more detail than the government-wide statements. Both presentations (government-wide and fund) allow the user to address relevant questions, broaden the basis of comparison and enhance the Town's accountability. An additional part of the basic financial statements are the notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the Town of Milton's finances, in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the Town's financial position, which assists in assessing the Town's economic position at the end of the year. The statements are prepared using the full accrual basis of accounting. All revenues and expenses connected with the year are considered even if cash involved has not been received or disbursed.

The government-wide financial statements include two statements:

The *statement of net position* presents information on all of the Town of Milton's assets, liabilities and deferred inflows/outflows, with the difference reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town of Milton is improving or deteriorating.

The *statement of activities* presents information showing how government's net position changed during the most recent year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the Town of Milton that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the Town of Milton include general government, public safety, highways and streets, public works and cemetery, education, health and human services, employee benefits, capital outlay, and culture and recreation. The business-type activities of the Town of Milton include the Water, Sewer and Stormwater funds.

Fund financial statements. A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Town of Milton, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town of Milton can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. *Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The Town of Milton adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

Proprietary funds. The Town maintains three types of proprietary funds.

Enterprise funds are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The Town uses enterprise funds to account for its water, sewer, and stormwater activities.

The *internal service fund* is used to account for the financing of services provided by one department to other departments or governmental units. This fund is used to account for risk financing activities related to active employees' and retirees' health insurance.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* all reflected in the government-wide financial statement because the resources of those funds are *not* available to support the Town of Milton's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* concerning the Town of Milton's budgetary basis of accounting.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Town of Milton, governmental assets and deferred outflows exceeded liabilities and deferred inflows by \$1.0 million at the close of the most recent year.

Comparative analysis of the assets, liabilities, net position, revenues, expenses and transfers of the governmental and business-type activities are discussed herein.

Governmental activities. Key components of the Town's governmental activities financial position are listed below.

	June 30, 2018	June 30, 2017
Assets:		
Current assets.....	\$ 42,582,261	\$ 40,049,609
Capital assets, non depreciable.....	5,649,465	5,380,827
Capital assets, net of accumulated depreciation.....	139,525,989	139,784,794
Total assets.....	187,757,715	185,215,230
 Deferred outflows of resources.....	4,271,000	6,520,000
 Liabilities:		
Current liabilities (excluding debt).....	3,914,446	4,424,669
Noncurrent liabilities (excluding debt).....	145,709,952	90,509,014
Current debt.....	3,094,353	5,147,791
Noncurrent debt.....	27,787,503	25,768,797
Total liabilities.....	180,506,254	125,850,271
 Deferred inflows of resources.....	10,515,521	906,196
 Net position:		
Net investment in capital assets.....	115,945,900	116,853,638
Restricted.....	19,537,239	26,234,509
Unrestricted.....	(134,476,199)	(78,109,384)
Total net position.....	\$ 1,006,940	\$ 64,978,763

The largest single portion of the Town of Milton's net position reflects its investment in capital assets (e.g., land, buildings, vehicles and equipment); less any related debt used to acquire those assets that is still outstanding.

The Town of Milton uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the Town of Milton's investment in its capital assets is reported net of related debt, it should be noted that resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the Town's net position represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position may be used to meet the government's ongoing obligations to citizens and creditors. Please note that this balance (deficit) of \$134.5 million reflects the impact of the OPEB and Pension liabilities.

At the end of the current year, the Town of Milton is able to report positive balances in two of the three categories of net position for governmental activities and all categories of net position for business-type activities.

Governmental activities increased the Town of Milton's net position by \$922,000. Key elements of this increase are as follows:

	June 30, 2018	June 30, 2017
Program Revenues:		
Charges for services.....	\$ 6,095,878	\$ 5,219,016
Operating grants and contributions.....	27,201,801	26,024,579
Capital grants and contributions.....	286,612	26,174
General Revenues:		
Real estate and personal property taxes, net of tax refunds payable.....	79,163,611	74,472,830
Motor vehicle and other excise taxes.....	4,217,838	4,348,162
Penalties and interest on taxes.....	406,339	339,612
Payments in lieu of taxes.....	105,392	103,276
Grants and contributions not restricted to specific programs.....	9,916,053	4,706,466
Unrestricted investment income.....	305,441	514,491
Miscellaneous.....	53,551	28,789
Total revenues.....	127,752,516	115,783,395
Expenses:		
General government.....	10,237,214	9,679,836
Public safety.....	22,262,979	22,218,361
Education.....	82,934,627	82,808,634
Public works.....	7,651,376	7,076,760
Human services.....	871,657	945,273
Library.....	1,854,428	1,711,497
Culture and recreation.....	1,619,059	1,392,781
Interest.....	553,372	623,380
Total expenses.....	127,984,712	126,456,522
Excess (Deficiency) before transfers.....	(232,196)	(10,673,127)
Transfers.....	1,153,982	1,094,000
Change in net position.....	921,786	(9,579,127)
Net position, beginning of year (as revised).....	85,154	74,557,890
Net position, end of year.....	\$ 1,006,940	\$ 64,978,763

The governmental activities increased \$922,000 during the current year as compared to a decrease in net position of \$9.6 million during the prior year. The main reason for this increase is the receipt of \$5.5 million from the sale of real estate willed to the Town, and a decrease of \$2.6 million in the net pension liability. These increases were offset by a \$5.0 million increase in the OPEB liability and the fact that depreciation expense exceeded principal payments by \$2.3 million.

Business-type activities. Business-type activities increased the Town of Milton's net position by \$315,000. Key elements of this increase are as follows.

	June 30, 2018	June 30, 2017
Assets:		
Current assets.....	\$ 12,238,956	\$ 11,816,521
Capital assets, non depreciable.....	778,034	1,000,826
Capital assets, net of accumulated depreciation.....	35,687,338	32,276,729
Total assets.....	48,704,328	45,094,076
 Deferred outflows of resources.....	203,000	310,000
 Liabilities:		
Current liabilities (excluding debt).....	1,168,600	519,149
Noncurrent liabilities (excluding debt).....	4,007,866	2,509,009
Current debt.....	1,470,170	1,252,214
Noncurrent debt.....	9,148,648	7,594,011
Total liabilities.....	15,795,284	11,874,383
 Deferred inflows of resources.....	464,427	-
 Net position:		
Net investment in capital assets.....	26,017,942	24,431,330
Unrestricted.....	6,629,675	9,098,363
Total net position.....	\$ 32,647,617	\$ 33,529,693
	June 30, 2018	June 30, 2017
 Program Revenues:		
Charges for services.....	\$ 14,116,343	\$ 14,652,178
Capital grants and contributions.....	685,500	-
 General Revenues:		
Unrestricted investment income.....	39,277	14,969
Total revenues.....	14,841,120	14,667,147
 Expenses:		
Water.....	5,675,315	5,028,607
Sewer.....	7,172,670	6,562,751
Stormwater.....	524,072	513,772
Total expenses.....	13,372,057	12,105,130
 Excess (Deficiency) before transfers.....	1,469,063	2,562,017
 Transfers.....	(1,153,982)	(1,094,000)
 Change in net position.....	315,081	1,468,017
 Net position, beginning of year (as revised).....	32,332,536	32,061,676
 Net position, end of year.....	\$ 32,647,617	\$ 33,529,693

Business-type activities net position increased by \$315,000 during the current year. The primary reason for the increase was an increase in usage and the fact that the rates are designed to support principal payments on long-term debt as well as making infrastructure improvements.

Financial Analysis of the Governmental Funds

As noted earlier, the Town of Milton uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the Town of Milton's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing the Town of Milton's financing requirements. In particular, *unassigned fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the year. As of the end of the current year, the Town of Milton's governmental funds reported combined ending balances of \$31.2 million, an increase of \$6.8 million in comparison with the prior year. The increase is attributable primarily to the timing of capital expenditures funded by bonds proceeds as well as one time contribution of \$5.5 million to the Town, which will be used to help underprivileged families within the community.

The general fund is the chief operating fund of the Town of Milton. At the end of the current year, unassigned fund balance of the general fund was \$7.3 million, of which \$4.6 million relates to its three stabilization funds. As a measure of the general fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures. Unassigned fund balance represents 6.6% of total general fund budgetary expenditures, while total fund balance represents 9.7% of that same amount.

The fund balance of the Town of Milton's general fund experienced a decrease of \$636,000 during the current year. The decrease is attributable primarily to a budgetary deficit of \$94,000, and transfers out to fund various Town capital projects.

Proprietary funds. The Town of Milton's proprietary funds provide the same type of information found in the government-wide financial statements.

Unrestricted net position of the Water, Sewer, and Stormwater funds at the end of the year amounted to \$3.2 million, \$3.3 million and \$116,000, respectively. The total change in net position for each fund was (\$211,000), \$386,000 and \$140,000, respectively.

General Fund Budgetary Highlights

There were no differences between the original budget and the final amended budget.

Capital Asset and Debt Administration

Capital assets. The Town of Milton's investment in capital assets for its governmental and business-type activities as of June 30, 2018, amounts to \$181.6 million (net of accumulated depreciation). This investment in capital assets includes land, buildings, system improvements, machinery and equipment, park facilities, roads, highways, and bridges.

Long-term debt. At the end of the current year, the Town of Milton had total bonded debt outstanding of \$40.7 million.

Town of Milton's General Obligation Bonds Outstanding

Project	Governmental	Business-Type	Total
	Activities	Activities	
Municipal Purpose Bonds of 2008	\$ 3,393,788	\$ -	\$ 3,393,788
Municipal Purpose Bonds of 2012.....	3,950,000	-	3,950,000
Municipal Purpose Bonds of 2014.....	2,647,000	-	2,647,000
Municipal Purpose Refunding Bonds of 2014	3,553,000	-	3,553,000
Municipal Purpose Refunding Bonds of 2015	3,200,000	-	3,200,000
Municipal Purpose Bonds of 2016	1,730,000	-	1,730,000
Municipal Purpose Bonds of 2017	745,000	-	745,000
Municipal Purpose Refunding Bonds of 2017	6,210,000	-	6,210,000
Municipal Purpose Bonds of 2018	5,148,979	-	5,148,979
Water System.....	-	7,746,086	7,746,086
Sewer System.....	-	1,542,333	1,542,333
Stormwater.....	-	800,000	800,000
Total.....	\$ 30,577,767	\$ 10,088,419	\$ 40,666,186

Standard & Poor's Corporation (S&P) has rated the Town's long-term debt AAA, S&P's highest rating; which indicates the Town's debt is considered to be a "high quality" investment.

Please refer to notes 4, 7 and 8 for further discussion of the major capital and debt activity.

Requests for Information

This financial report is designed to provide a general overview of the Town of Milton's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Accountant's Office, 525 Canton Avenue, Milton, MA 02186.

**RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES**

YEAR ENDED JUNE 30, 2018

Net change in fund balances - total governmental funds.....	\$ 6,768,103
---	--------------

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.

Capital outlay.....	5,413,278
Depreciation expense.....	<u>(5,403,445)</u>

Net effect of reporting capital assets.....	9,833
---	-------

Revenues in the Statement of Activities that do not provide current financial resources are unavailable in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable differ between the two statements. This amount represents the net change in unavailable revenue..... (463,258)

The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are unavailable and amortized in the Statement of Activities.

Principal payments on capital leases.....	8,036
Issuance of bonds.....	<u>(5,148,979)</u>
Net amortization of premium from issuance of bonds.....	97,573
Net change in deferred charge on refunding.....	178,857
Debt service principal payments.....	<u>3,155,728</u>

Net effect of reporting long-term debt.....	(1,708,785)
---	-------------

Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds.

Net change in compensated absences accrual.....	(14,222)
Net change in accrued interest on long-term debt.....	(64,150)
Net change in deferred outflow/(inflow) of resources related to pensions.....	<u>(12,014,000)</u>
Net change in net pension liability.....	14,612,000
Net change in deferred outflow/(inflow) of resources related to other postemployment benefits...	(23,182)
Net change in other postemployment benefits liability.....	<u>(5,004,243)</u>
Net change in workers' compensation liability.....	<u>172,864</u>

Net effect of recording long-term liabilities.....	(2,334,933)
--	-------------

The net activity of internal service funds is reported with Governmental Activities.....

<u>(1,349,174)</u>	
--------------------	--

Change in net position of governmental activities.....	<u>\$ 921,786</u>
--	-------------------

See notes to basic financial statements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying basic financial statements of the Town of Milton, Massachusetts (Town) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting policies are described herein.

A. Reporting Entity

The Town is a municipal corporation that is governed by an elected Board of Selectmen and an appointed Town Administrator.

For financial reporting purposes, the Town has included all funds, organizations, account groups, agencies, boards, commissions and institutions. The Town has also considered all potential component units for which it is financially accountable as well as other organizations for which the nature and significance of their relationship with the Town are such that exclusion would cause the basic financial statements to be misleading or incomplete. As required by GAAP, these basic financial statements present the Town (the primary government) and its component units. One entity has been included as a component unit in the reporting entity, because of the significance of its operational and/or financial relationship.

Component Unit Presented as a Fiduciary Fund – The following component unit is presented as a Fiduciary Fund of the primary government due to the nature and significance of the relationship between the Town and the component unit.

The Milton Contributory Retirement System (MCRS) was established to provide retirement benefits to Town employees, the Town Housing Authority employees, and their beneficiaries. The MCRS is governed by a five-member board comprised of the Town Accountant (ex-officio), two elected members, a member appointed by the Board of Selectmen and a member appointed by the other four members. The MCRS is presented using the accrual basis of accounting and is reported as a pension trust fund in the fiduciary fund financial statements.

The System did not issue a separate audited financial statement. The System issues a publicly available unaudited financial report in accordance with guidelines established by the Commonwealth of Massachusetts' (Commonwealth) Public Employee Retirement Administration Commission (PERAC). That report may be obtained by contacting the System located at 191 Cabot Street, Beverly, Massachusetts 01915.

Joint Ventures

The Town has entered into a joint venture with the Towns of Avon, Canton, Dedham, Braintree, Holbrook, Westwood, Norwood, and Randolph to pool resources and share the costs, risks and rewards of providing vocational education through the Blue Hills Regional Technical School District. The assessment for 2018 was \$828,132.

The Town is a member of the Massachusetts Water Resources Authority (MWRA), a joint venture with other Massachusetts governmental entities that was organized to provide water and sewer services to the respective members' Cities, Towns, and Districts. Complete financial statements for the MWRA can be obtained directly from their administrative office located at 100 First Avenue, Building 39, Boston, Massachusetts 02129.

Availability of Financial Information for Component Units

The MCRS did not issue a separate audited financial statement. The MCRS issues a publicly available unaudited financial report in accordance with guidelines established by the Commonwealth of Massachusetts' (Commonwealth) Public Employee Retirement Administration Commission (PERAC). That report may be obtained by contacting the MCRS located at 40 Willard Street, Suite G102, Quincy, Massachusetts, 02169.

B. Government-Wide and Fund Financial Statements

Government-Wide Financial Statements

The government-wide financial statements (i.e., statement of net position and the statement of changes in net position) report information on all of the non-fiduciary activities of the primary government and its component units. *Governmental activities*, which are primarily supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which are supported primarily by user fees and charges.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. Nonmajor funds are aggregated and displayed in a single column.

Major Fund Criteria

Major funds must be reported if the following criteria are met:

- If total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of an individual governmental or enterprise fund are at least 10 percent of the corresponding element (assets and deferred outflows of resources, liabilities and deferred inflows or resources, etc.) for all funds of that category or type (total governmental or total enterprise funds), *and*
- If the total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5 percent of the corresponding element for all governmental and enterprise funds combined.

Additionally, any other governmental or enterprise fund that management believes is particularly significant to the basic financial statements may be reported as a major fund.

Internal service funds and fiduciary funds are reported by fund type.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

Government-Wide Financial Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred. Real estate and personal property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The statement of activities demonstrates the degree to which the direct expenses of a particular function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include the following:

- Charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment.
- Grants and contributions restricted to meeting the operational requirements of a particular function or segment.
- Grants and contributions restricted to meeting the capital requirements of a particular function or segment.

Taxes and other items not identifiable as program revenues are reported as general revenues. For the most part, the effect of interfund activity has been removed from the government-wide financial statements. Exceptions are charges between the general fund and water and sewer enterprise fund. Elimination of these charges would distort the direct costs and program revenues reported for the functions affected.

Fund Financial Statements

Governmental fund financial statements are reported using the flow of current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., measurable and available). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on general long-term debt which is recognized when due, and certain compensated absences, claims and judgments which are recognized when the obligations are expected to be liquidated with current expendable available resources.

Real estate and personal property tax revenues are considered available if they are collected within 60 days after year-end. Investment income is susceptible to accrual. Other receipts and tax revenues become measurable and available when the cash is received and are recognized as revenue at that time.

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria is met. Expenditure driven grants recognize revenue when the qualifying expenditures are incurred and all other grant requirements are met.

The following major governmental funds are reported:

The *general fund* is the primary operating fund. It is used to account for all financial resources, except those that are required to be accounted for in another fund.

The *town capital projects fund* is used to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by enterprise and trust funds).

The *permanent expendable funds* is used to account for and report financial resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the governmental programs.

The nonmajor governmental funds consist of other special revenue, capital projects and permanent funds that are aggregated and presented in the *nonmajor governmental funds* column on the governmental funds financial statements.

The following describes the general use of these fund types:

The *special revenue fund* is used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than permanent funds or capital projects.

The *capital projects fund* is used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets of the governmental funds.

The *permanent nonexpendable fund* is used to account for and report financial resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the governmental programs.

Proprietary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary funds principal ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The *water, sewer, and stormwater enterprise funds* are used to account for the water, sewer, and stormwater activities.

Additionally, the Town reports an *internal service fund* as a proprietary fund type. This fund is used to account for the risk financing activities related to active employees' and retirees' health insurance.

Fiduciary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Fiduciary funds are used to account for assets held in a trustee capacity for others that cannot be used to support the governmental programs.

The following fiduciary fund types are reported:

The *other postemployment benefit trust fund* is used to account for other postemployment benefit (OPEB), which accumulate resources to provide funding for future OPEB liabilities.

The *pension trust fund* is used to account for the activities of the MCRS, which accumulates resources to provide pension benefits to eligible retirees and their beneficiaries.

The *private-purpose trust fund* is used to account for trust arrangements, other than those properly reported in the pension trust fund or permanent fund, under which principal and investment income exclusively benefit individuals, private organizations, or other governments.

Government-Wide and Fund Financial Statements

For the government-wide financial statements, and proprietary and fiduciary fund accounting, all applicable Financial Accounting Standards Board (FASB) pronouncements issued on or prior to November 30, 1989, are applied, unless those pronouncements conflict with or contradict GASB pronouncements.

D. Cash and Investments*Government-Wide and Fund Financial Statements*

Cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with an original maturity of three months or less from the date of acquisition. Investments are carried at fair value.

E. Fair Value Measurement

The Town reports required types of financial instruments in accordance with the fair value standards. These standards require an entity to maximize the use of observable inputs (such as quoted prices in active markets) and minimize the use of unobservable inputs (such as appraisals or valuation techniques) to determine fair value. Fair value standards also require the government to classify these financial instruments into a three-level hierarchy, based on the priority of inputs to the valuation technique or in accordance with net asset value practical expedient rules, which allow for either Level 2 or Level 3 depending on lock up and notice periods associated with the underlying funds.

Instruments measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 – Quoted prices are available in active markets for identical instruments as of the reporting date. Instruments, which are generally included in this category, include actively traded equity and debt securities, U.S. government obligations, and mutual funds with quoted market prices in active markets.

Level 2 – Pricing inputs are other than quoted in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Certain fixed income securities, primarily corporate bonds, are classified as Level 2 because fair values are estimated using pricing models, matrix pricing, or discounted cash flows.

Level 3 – Pricing inputs are unobservable for the instrument and include situations where there is little, if any, market activity for the instrument. The inputs into the determination of fair value require significant management judgment or estimation.

In some instances the inputs used to measure fair value may fall into different levels of the fair value hierarchy and is based on the lowest level of input that is significant to the fair value measurement.

Market price is affected by a number of factors, including the type of instrument and the characteristics specific to the instrument. Instruments with readily available active quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. It is reasonably possible that change in values of these instruments will occur in the near term and that such changes could materially affect amounts reported in these financial statements. For more information on the fair value of the Town's and Retirement System financial instruments, see Note 2 – Fair Value Measurements.

F. Accounts Receivable*Government-Wide and Fund Financial Statements*

The recognition of revenue related to accounts receivable reported in the government-wide financial statements and the proprietary funds and fiduciary funds financial statements are reported under the accrual basis of accounting. The recognition of revenue related to accounts receivable reported in the governmental funds financial statements are reported under the modified accrual basis of accounting.

Real Estate, Personal Property Taxes and Tax Liens

Real estate and personal property taxes are levied and based on values assessed on January 1st of every year. Assessed values are established by the Board of Assessor's for 100% of the estimated fair market value. Taxes are due on August 1st, November 1st, February 1st and May 1st and are subject to penalties and interest if they are not paid by the respective due date. Real estate and personal property taxes levied are recorded as receivables in the year of the levy.

Real estate tax liens are processed six months after the close of the valuation year on delinquent properties and are recorded as receivables in the year they are processed.

Real estate receivables are secured via the tax lien process and are considered 100% collectible. Accordingly, an allowance for uncollectibles is not reported.

Personal property taxes cannot be secured through the lien process. The allowance of uncollectibles is estimated based on historical trends and specific account analysis.

Motor Vehicle and Other Excise Taxes

Motor vehicle excise taxes are assessed annually for each vehicle registered and are recorded as receivables in the year of the levy. The Commonwealth is responsible for reporting the number of vehicles registered and the fair values of those vehicles. The tax calculation is the fair value of the vehicle multiplied by \$25 per \$1,000 of value.

The allowance for uncollectibles is estimated based on historical trends and specific account analysis.

Water and Sewer User Fees

User fees are levied monthly based on individual meter readings and are subject to penalties and interest if they are not paid by the respective due date. Unbilled user fees are estimated at year-end and are recorded as revenue in the current period. Water and Sewer liens are processed in December of every year and included as a lien on the property owner's tax bill. Water and Sewer charges and liens are recorded as receivables in the year of the levy.

Since the receivables are secured via the lien process, these accounts are considered 100% collectible and therefore do not report an allowance for uncollectibles.

Departmental and Other

Departmental and other receivables consist primarily of police details and are recorded as receivables in the year accrued. The allowance of uncollectibles is estimated based on historical trends and specific account analysis.

Intergovernmental

Various federal and state grants for operating and capital purposes are applied for and received annually. For non-expenditure driven grants, receivables are recorded as soon as all eligibility requirements imposed by the provider have been met. For expenditure driven grants, receivables are recorded when the qualifying expenditures are incurred and all other grant requirements are met.

These receivables are considered 100% collectible and therefore do not report an allowance for uncollectibles.

G. Inventories*Government-Wide and Fund Financial Statements*

Inventories are recorded as expenditures at the time of purchase. Such inventories are not material in total to the government-wide and fund financial statements, and therefore are not reported.

H. Capital Assets*Government-Wide and Proprietary Fund Financial Statements*

Capital assets, which include land, land improvements, buildings, vehicles and equipment, and infrastructure (e.g., roads, water mains, sewer mains, and similar items), are reported in the applicable governmental or business-type activity column of the government-wide financial statements, and the proprietary fund financial statements. Capital assets are recorded at historical cost, or at estimated historical cost, if actual historical cost is not available. Donated capital assets are recorded at the estimated fair market value at the date of donation. Except for the capital assets of the governmental activities column in the government-wide financial statements, construction period interest is capitalized on constructed capital assets.

All purchases and construction costs in excess of \$25,000 are capitalized at the date of acquisition or construction, respectively, with expected useful lives of greater than one year.

Capital assets (excluding land and construction in progress) are depreciated on a straight-line basis. The estimated useful lives of capital assets are as follows:

<u>Capital Asset Type</u>	<u>Estimated Useful Life (in years)</u>
Land improvements.....	30
Buildings.....	40
Vehicles and equipment.....	5-40
Infrastructure.....	40-50

The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized and are treated as expenses when incurred. Improvements are capitalized.

Governmental Fund Financial Statements

Capital asset costs are recorded as expenditures in the acquiring fund in the year of the purchase.

I. Deferred Outflows/Inflows of Resources*Government-Wide Financial Statements (Net Position)*

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until then. The Town reports deferred outflow of resources related to pensions in this category.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. The Town reports deferred charges on refunding debt, and deferred inflows of resources related to pensions and OPEB in this category.

Governmental Fund Financial Statements

In addition to liabilities, the governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents assets that have been recorded in the governmental fund financial statements but the revenue is not available and so will *not* be recognized as an inflow of resources (revenue) until it becomes available. The Town has recorded unavailable revenue as deferred inflows of resources in the governmental funds balance sheet. Unavailable revenue is recognized as revenue in the conversion to the government-wide (full accrual) financial statements.

J. Net Position Flow Assumption

Government-Wide Financial Statements (Net Position)

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

K. Interfund Receivables and Payables

During the course of its operations, transactions occur between and within individual funds that may result in amounts owed between funds.

Government-Wide Financial Statements

Transactions of a buyer/seller nature between and within governmental funds and internal service funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the statement of net position as "internal balances."

Fund Financial Statements

Transactions of a buyer/seller nature between and within funds are *not* eliminated from the individual fund statements. Receivables and payables resulting from these transactions are classified as "Due from other funds" or "Due to other funds" on the balance sheet.

L. Interfund Transfers

During the course of its operations, resources are permanently reallocated between and within funds. These transactions are reported as transfers in and transfers out.

Government-Wide Financial Statements

Transfers between and within governmental funds and internal service funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the statement of activities as "Transfers, net."

Fund Financial Statements

Transfers between and within funds are *not* eliminated from the individual fund statements and are reported as transfers in and transfers out.

M. Net Position and Fund Equity*Government-Wide Financial Statements (Net Position)*

Net position is reported as restricted when amounts that are not available for appropriation or are legally restricted by outside parties for a specific future use.

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town's policy to consider restricted – net position to have depleted before unrestricted – net position is applied.

Net position has been "restricted for" the following:

"Permanent funds – expendable" represents the amount of realized and unrealized investment earnings of donor restricted trusts. The restrictions and trustee policies only allows the trustee to approve spending of the realized investment earnings.

"Permanent funds – nonexpendable" represents amounts held in trust for which only investment earnings may be expended.

"Other purposes" represents restrictions placed on assets from outside parties.

Fund Financial Statements (Fund Balances)

The governmental fund balance classifications are as follows:

"Nonspendable" fund balance includes amounts that cannot be spent because they are either not in spendable form or they are legally or contractually required to be maintained intact.

"Restricted" fund balance includes amounts subject to constraints placed on the use of resources that are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or that are imposed by law through constitutional provisions or enabling legislation.

"Committed" fund balance includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority.

"Assigned" fund balance includes amounts that are constrained by the Town's intent to be used for specific purposes, but are neither restricted nor committed.

“Unassigned” fund balance includes the residual classification for the general fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the general fund.

The Town’s spending policy is to spend restricted fund balance first, followed by committed, assigned and unassigned fund balance. Most governmental funds are designated for one purpose at the time of their creation. Therefore, any expenditure from the fund will be allocated to the applicable fund balance classifications in the order of the aforementioned spending policy. The general fund and certain other funds may have more than one purpose.

N. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, contributions, and pension expense, information about the fiduciary net position of both the Milton Contributory Retirement System and the Massachusetts Teachers Retirement System. Additions to/deductions from the Systems’ fiduciary net position have been determined on the same basis as they are reported by the Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

O. Capital Lease Obligations

The Town leases various assets under capital lease agreements. In the government-wide and proprietary funds financial statements, capital leases and the related lease obligations are reported as liabilities in the applicable governmental activities or proprietary funds statement of net position.

P. Long-term debt

Government-Wide and Proprietary Fund Financial Statements

Long-term debt is reported as liabilities in the government-wide and proprietary fund statement of net position. Material bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

Governmental Fund Financial Statements

The face amount of governmental funds long-term debt is reported as other financing sources. Bond premiums and discounts, as well as issuance costs, are recognized in the current period. Bond premiums are reported as other financing sources and bond discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual bond proceeds received, are reported as general government expenditures.

Q. Investment Income

Excluding the permanent funds, investment income derived from major and nonmajor governmental funds is legally assigned to the general fund unless otherwise directed by Massachusetts General Law (MGL).

Investment income from proprietary funds is retained by that fund.

R. Compensated Absences

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements, state laws and executive policies.

Government-Wide and Proprietary Fund Financial Statements

Vested or accumulated vacation and sick leave are reported as liabilities and expensed as incurred.

Governmental Fund Financial Statements

Vested or accumulated vacation and sick leave, which will be liquidated with expendable available financial resources, are reported as expenditures and fund liabilities.

S. Use of Estimates*Government-Wide and Fund Financial Statements*

The preparation of basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure for contingent assets and liabilities at the date of the basic financial statements and the reported amounts of the revenues and expenditures/expenses during the year. Actual results could vary from estimates that were used.

T. Total Column*Government-Wide Financial Statements*

The total column presented on the government-wide financial statements represents consolidated financial information.

Fund Financial Statements

The total column on the fund financial statements is presented only to facilitate financial analysis. Data in this column is not the equivalent of consolidated financial information.

NOTE 2 - CASH AND INVESTMENTS

A cash and investment pool is maintained that is available for use by all funds. Each fund type's portion of this pool is displayed on the combined balance sheet as "Cash and Cash Equivalents." The deposits and investments of the trust funds are held separately from those of other funds.

Statutes authorize the investment in obligations of the U.S. Treasury, agencies, and instrumentalities, certificates of deposit, repurchase agreements, money market accounts, bank deposits and the State Treasurer's Investment Pool (Pool). The Treasurer may also invest trust funds in securities, other than mortgages or collateral loans, which are legal for the investment of funds of savings banks under the laws of the Commonwealth.

The Pool meets the criteria of an external investment pool. The Pool is administered by the Massachusetts Municipal Depository Trust (MMDT), which was established by the Treasurer of the Commonwealth who serves as Trustee. The fair value of the position in the Pool is the same as the value of the Pool shares.

The Pension Reserves Investment Management (PRIM) Board is charged with the general supervision of the Pension Reserves Investment Trust (PRIT) Fund. The PRIT Fund is a pooled investment fund established to invest the pension funds of the Massachusetts State Employees' and Teachers' Retirement Systems, and the assets of the county, authority, district, and municipal retirement systems that choose to invest in the Fund. The PRIT Fund was created in December 1983 by the Legislature (Chapter 661, Acts 1983) with a mandate to

accumulate the assets through investment earnings and other revenue sources in order to reduce the Commonwealth's significant unfunded pension liability, and to assist local participating retirement systems in meeting their future pension obligations.

Custodial Credit Risk – Deposits

In the case of deposits, this is the risk that in the event of a bank failure, the Town's deposits may not be returned to it. The Town's policy for custodial risk is to place funds in institutions that provide the highest possible rate of interest reasonably available, taking into account safety, liquidity and yield and uses recognized bank rating services as a basis for this determination. At year-end, the carrying amount of deposits totaled \$31,182,102 and the bank balance totaled \$32,389,197 of the bank balance, \$2,075,340 was covered by Federal Depository Insurance, \$12,381,280 was covered by Depositors Insurance Fund Insurance, \$7,960,353 was collateralized and \$9,972,224 was exposed to custodial credit risk because it was uninsured and uncollateralized.

At December 31, 2017, the carrying amount of deposits for the System totaled \$1,711,611 and the bank balance of \$1,797,636 is 100% insured.

Custodial Credit Risk – Investments

For an investment, this is the risk that, in the event of a failure by the counterparty, the Town will not be able to recover the value of its investments or collateral security that are in the possession of an outside party. The Town's investments of \$1,846,680 in Government sponsored enterprises, \$6,922,483 in U.S. Treasury bonds, \$275,395 in corporate bonds, and \$2,161,253 in equity securities have a custodial credit risk exposure of \$2,161,253 because the related securities are uninsured, unregistered and held by the counterparty. \$979,710 of PRIT does not have any custodial credit risk associated with it. The Town's policy for custodial credit risk is to invest its funds with companies that provide a proof of credit worthiness which includes a minimum of five years in operation and capital of \$10 million.

At December 31, 2017 investments of \$133,371,697 in the PRIT Fund do not have any custodial credit risk associated with it.

Investments

The Town had the following investments, with their respective maturities, at June 30, 2018:

Investment Type	Fair value	Maturities	
		Under 1 Year	1-5 Years
Debt securities:			
U.S. treasury bonds.....	\$ 6,922,483	\$ 6,922,483	\$ -
Government sponsored enterprises.....	1,846,680	1,591,920	254,760
Corporate bonds.....	<u>275,395</u>	<u>-</u>	<u>275,395</u>
Total debt securities.....	<u>9,044,558</u>	<u>8,514,403</u>	<u>\$ 530,155</u>
Other investments:			
Equity securities.....	2,161,253		
Money market mutual funds.....	1,801,999		
Pension Reserve Investment Trust (PRIT).....	979,710		
MMDT - cash portfolio.....	<u>2,606,991</u>		
Total investments.....	<u>\$ 16,594,511</u>		

Interest Rate Risk

The Town and the System uses PRIT guidelines as a means of managing its exposure to fair value losses arising from increasing interest rates. The System and the Town's OPEB fund participates in PRIT. The effective weighted duration rate for PRIT investments ranged from 0.15 to 16.31 years.

Credit Risk

The Town uses PRIT guidelines as a means to manage credit risk. Standard and Poor's Investors Service rated the Town's investments as follows:

Quality Rating	U.S. Treasury Bonds	Government Sponsored Enterprises	Corporate Bonds
AAA.....	\$ 6,922,483	\$ -	\$ -
AA+.....	-	1,846,680	-
A-.....	-	-	32,221
BBB+.....	-	-	152,517
BBB-.....	-	-	90,657
Total.....	\$ 6,922,483	\$ 1,846,680	\$ 275,395

Concentration of Credit Risk

The Town uses PRIT guidelines in limiting the amount the Town may invest in any one issuer. The Town does not have more than 5% of the investments invested in one issuer.

Fair Value of Investments

The Town holds investments that are measured at fair value on a recurring basis. Because investing is not a core part of the Town's mission, the Town determines that the disclosures related to these investments only need to be disaggregated by major type. The Town chooses a tabular format for disclosing the levels within the fair value hierarchy.

Investment Type	June 30, 2018	Fair Value Measurements Using			
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Investments measured at fair value:					
<u>Debt securities:</u>					
U.S. treasury bonds.....	\$ 6,922,483	\$ 6,922,483	\$ -	\$ -	
Government sponsored enterprises.....	1,846,680	1,846,680	-	-	
Corporate bonds.....	275,395	-	275,395	-	
Total debt securities.....	<u>9,044,558</u>	<u>8,769,163</u>	<u>275,395</u>	<u>-</u>	
<u>Other investments:</u>					
Equity securities.....	2,161,253	2,161,253	-	-	
Money market mutual funds.....	1,801,999	1,801,999	-	-	
Total other investments.....	<u>3,963,252</u>	<u>3,963,252</u>	<u>-</u>	<u>-</u>	
Total investments measured at fair value.....	<u>13,007,810</u>	<u>\$ 12,732,415</u>	<u>\$ 275,395</u>	<u>\$ -</u>	
Investments measured at amortized cost:					
MMDT - cash portfolio.....	<u>2,606,991</u>				
Investments measured at net asset value:					
Pension Reserve Investment Trust (PRIT).....	<u>979,710</u>				
Total investments.....	<u>\$ 16,594,511</u>				

U.S. treasury bonds, government sponsored enterprises, equities and money market mutual funds classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Corporate bonds classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

Retirement System - Investments in PRIT of \$133,371,697 are measured at net asset value.

NOTE 3 - RECEIVABLES

At June 30, 2018, receivables for the individual major and non-major governmental funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	Gross Amount	Allowance for Uncollectibles	Net Amount
Receivables:			
Real estate and personal property taxes.....	\$ 960,711	\$ -	\$ 960,711
Tax liens and foreclosures.....	2,622,019	-	2,622,019
Motor vehicle and other excise taxes.....	548,611	(114,000)	434,611
Departmental and other.....	117,204	-	117,204
Intergovernmental.....	632,422	-	632,422
Total.....	\$ 4,880,967	\$ (114,000)	\$ 4,766,967

At June 30, 2018, receivables for the water, sewer, and stormwater enterprise funds consist of the following:

	Gross Amount	Allowance for Uncollectibles	Net Amount
Receivables:			
Water user charges.....	\$ 1,302,906	\$ -	\$ 1,302,906
Sewer user charges.....	1,936,442	-	1,936,442
Stormwater user charges.....	129,983	-	129,983
Total.....	\$ 3,369,331	\$ -	\$ 3,369,331

Governmental funds report *unavailable revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. At the end of the current year, the various components of *unavailable revenue* reported in the governmental funds were as follows:

	General Fund	Other Governmental Funds	Total
Receivables:			
Real estate and personal property taxes.....	\$ 906,258	\$ -	\$ 906,258
Tax liens and foreclosures.....	2,475,844	-	2,475,844
Motor vehicle and other excise taxes.....	434,611	-	434,611
Departmental and other.....	-	117,204	117,204
Intergovernmental.....	-	489,856	489,856
Total.....	\$ 3,816,713	\$ 607,060	\$ 4,423,773

NOTE 4 - CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2018, was as follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Governmental Activities:				
<u>Capital assets not being depreciated:</u>				
Land.....	\$ 1,597,758	\$ -	\$ -	\$ 1,597,758
Construction in progress.....	3,783,069	268,638	-	4,051,707
Total capital assets not being depreciated.....	<u>5,380,827</u>	<u>268,638</u>	<u>-</u>	<u>5,649,465</u>

Stormwater:				
<u>Capital assets not being depreciated:</u>				
Construction in progress.....	\$ -	\$ 778,034	\$ -	\$ 778,034

Depreciation expense was charged to functions/programs of the primary government as follows:

Governmental Activities:

General government.....	\$ 157,076
Public safety.....	292,465
Education.....	4,160,835
Public works.....	452,801
Human services.....	27,275
Culture and recreation.....	18,403
Library.....	294,590

Total depreciation expense - governmental activities..... \$ 5,403,445

Business-Type Activities:

Water.....	\$ 665,871
Sewer.....	385,643

Total depreciation expense - business-type activities..... \$ 1,051,514

NOTE 5 - INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS

Interfund receivables and payables between funds at June 30, 2018 are summarized as follows:

Receivable Fund	Payable Fund	Amount
Governmental Activities:		
Town revolving fund.....	Highway improvement fund.....	\$ 133,912

Represents advances between funds to meet temporary cash flow needs.

Interfund transfers for the year ended June 30, 2018, are summarized as follows:

Transfers Out:	Transfers In:				Total
	General fund	Town Capital Projects	Permanent Funds	Nonmajor governmental funds	
General fund.....	\$ -	\$ 790,000	\$ 40,000	\$ 897,445	\$ 1,727,445 (1)
Nonmajor governmental funds.....	120,507	-	-	-	120,507 (1)
Water enterprise fund.....	485,000	-	-	-	485,000 (2)
Sewer enterprise fund.....	534,000	-	-	-	534,000 (2)
Stormwater enterprise fund.....	134,982	-	-	-	134,982 (2)
Total.....	\$ 1,274,489	\$ 790,000	\$ 40,000	\$ 897,445	\$ 3,001,934

(1) Represents budgeted transfers between general fund, Town capital projects and permanent funds.
 (2) Reimbursement of indirect expenditures paid by the general fund.

NOTE 6 – CAPITAL LEASES

The Town has entered various lease agreements to finance the acquisition vehicles. These lease agreements qualify as capital leases for accounting purposes and, therefore, have been recorded at the present value of their future minimum lease payments as of the inception date. The amount capitalized totaled \$308,183 and at year-end was fully depreciated. During 2018, the Town made their final payment of \$8,036.

NOTE 7 - SHORT-TERM FINANCING

Short-term debt may be authorized and issued to fund the following:

- Current operating costs prior to the collection of revenues through issuance of revenue or tax anticipation notes (RANS or TANS).
- Capital project costs and other approved expenditures incurred prior to obtaining permanent financing through issuance of bond anticipation notes (BANS) or grant anticipation notes (GANS).

Short-term loans are general obligations and carry maturity dates that are limited by statute. Interest expenditures and expenses for short-term borrowings are accounted for in the General Fund. Details related to the short-term debt activity for the year ended June 30, 2018, are as follows:

Type	Purpose	Rate (%)	Due Date	Balance at June 30, 2017	Renewed/ Issued	Retired/ Redeemed	Balance at June 30, 2018
Governmental Funds:							
BAN	Municipal Purpose.....	0.37%	03/08/18	\$ 1,893,410	\$ -	\$ (1,893,410)	\$ -
BAN	Municipal Purpose.....	2.25%	08/30/18	\$ -	\$ 5,148,979	\$ (5,148,979)	\$ -
	Total Governmental Funds.....			\$ 1,893,410	\$ 5,148,979	\$ (7,042,389)	\$ -
Water Enterprise Fund:							
BAN	Municipal Purpose.....	0.37%	03/08/18	\$ 206,000	\$ -	\$ (206,000)	\$ -
BAN	Municipal Purpose.....	2.25%	08/30/18	\$ -	\$ 1,418,000	\$ (887,601)	\$ 530,399
	Total Water Enterprise Fund.....			\$ 206,000	\$ 1,418,000	\$ (1,093,601)	\$ 530,399
Sewer Enterprise Fund:							
BAN	Municipal Purpose.....	0.37%	03/08/18	\$ 95,000	\$ -	\$ (95,000)	\$ -
BAN	Municipal Purpose.....	2.25%	08/30/18	\$ -	\$ 578,000	\$ (578,000)	\$ -
	Total Sewer Enterprise Fund.....			\$ 95,000	\$ 578,000	\$ (673,000)	\$ -
Stormwater Enterprise Fund:							
BAN	Municipal Purpose.....	2.25%	08/30/18	\$ -	\$ 800,000	\$ (800,000)	\$ -
	Total Enterprise Funds.....			\$ 301,000	\$ 2,796,000	\$ (2,566,601)	\$ 530,399

On August 28, 2018, the Town permanently financed \$7,414,580 of short-term debt. This is reflected in both the short-term debt schedule and the long-term debt schedule. The remaining \$530,399 was paid down subsequent to year end.

NOTE 8 - LONG-TERM DEBT

Under the provisions of Chapter 44, Section 10, Municipal Law authorizes indebtedness up to a limit of 5% of the equalized valuation. Debt issued in accordance with this section of the law is designated as being "inside the debt limit." In addition, however, debt may be authorized in excess of that limit for specific purposes. Such debt, when issued, is designated as being "outside the debt limit."

Details related to the outstanding indebtedness at June 30, 2018, and the debt service requirements are as follows:

Bonds and Notes Payable Schedule – Governmental Funds

Project	Maturities Through	Original Loan Amount	Interest Rate (%)	Outstanding at June 30, 2018

The Massachusetts Water Resource Authority (MWRA) operates an Infiltration/Inflow Financial Assistance Program for community owned collection systems. For each community approved for the project, financial assistance received from the MWRA consists of a grant and non-interest bearing loan. The loan portion is payable in five equal annual installments. At June 30, 2018, the outstanding principal amount of these loans totaled \$2,012,035.

The Town is scheduled to be subsidized by the Massachusetts Clean Water Trust (MCWT) on a periodic basis for principal in the amount of approximately \$20,000 and interest costs for \$6,000. Thus, net MCWT loan repayments, including interest, are scheduled to be \$51,000. Since the Town is legally obligated for the total amount of the debt, such amounts have been reported in the accompanying basic financial statements. The year 2018 principal and interest subsidies totaled approximately \$3,700 and \$2,300, respectively.

The Town is subject to various debt limits by statute and may issue additional general obligation debt under the normal debt limit. At June 30, 2018, the Town had the following authorized and unissued debt:

Purpose	Amount
Sewer capital needs.....	\$ 28,000
Various capital.....	150,000
Water rehab (MWRA).....	1,000,000
Sewer capital needs.....	218,250

NOTE 9 – GOVERNMENTAL FUND BALANCE CLASSIFICATIONS

GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions* is intended to provide a more structured classification of fund balance and to improve the usefulness of fund balance reporting to the users of the Town's financial statements. The reporting standard establishes a hierarchy for fund balance classification and the constraints imposed on the uses of those resources. The GASB provides for two major types of fund balance, which are nonspendable and spendable. Nonspendable fund balances are balances that cannot be spent because they are not expected to be converted to cash or they are legally or contractually required to remain intact. Examples of this classification are prepaid items, inventories, and principal (corpus) of an endowment fund. The Town has reported principal portion of endowment funds as nonspendable.

In addition to the nonspendable fund balance, GASB 54 has provided a hierarchy of spendable fund balances, based on a hierarchy of spending constraints.

- Restricted: fund balances that are constrained by external parties, constitutional provisions, or enabling legislation.
- Committed: fund balances that contain self-imposed constraints of the government from its highest level of decision making authority.
- Assigned: fund balances that contain self-imposed constraints of the government to be used for a particular purpose.
- Unassigned: fund balance of the general fund that is not constrained for any particular purpose.

As of June 30, 2018, the governmental fund balances consisted of the following:

	General	Town Capital Projects	Permanent Fund	Nonmajor Governmental Funds	Total Governmental Funds
Fund Balances:					
Nonspendable:					
Permanent fund principal.....	\$ -	\$ -	\$ -	\$ 2,678,927	\$ 2,678,927
Restricted for:					
Town capital projects.....		1,580,185	-	-	1,580,185
Other special revenue.....		-	-	2,210	2,210
School gifts and grants.....		-	-	34,264	34,264
School lunch.....		-	-	940,046	940,046
School revolving.....		-	-	2,828,549	2,828,549
Town gifts and grants.....		-	-	1,038,197	1,038,197
Student activity.....		-	-	84,313	84,313
Town revolving.....		-	-	1,247,611	1,247,611
Receipts reserved.....		-	-	522,376	522,376
School capital project funds.....		-	-	27,117	27,117
Permanent funds.....		-	9,481,196	74,740	9,555,936
Assigned to:					
Encumbrances:					
General government.....	410,372	-	-	-	410,372
Public safety.....	132,683	-	-	-	132,683
Education.....	3,122	-	-	-	3,122
Public works.....	53,512	-	-	-	53,512
Human services.....	252	-	-	-	252
Culture and recreation.....	580	-	-	-	580
Employee benefits.....	1,025	-	-	-	1,025
Free cash used for subsequent year budget.....	2,766,622	-	-	-	2,766,622
Unassigned.....	<u>7,297,417</u>	<u>-</u>	<u>-</u>	<u>(2,250)</u>	<u>7,295,167</u>
Total Fund Balances.....	\$ <u>10,665,585</u>	\$ <u>1,580,185</u>	\$ <u>9,481,196</u>	\$ <u>9,476,100</u>	\$ <u>31,203,066</u>

Massachusetts General Law Ch.40 §5B allows for the establishment of stabilization funds for one or more different purposes. The creation of a fund requires a two-thirds vote of the legislative body and must clearly define the purpose of the fund. Any change to the purpose of the fund along with any additions to or appropriations from the fund requires a two-thirds vote of the legislative body.

At year end the balances of the General Stabilization, Capital Stabilization, and Roadway Stabilization was \$4.4 million, \$70,000, and \$100,000, respectively. All are reported as unassigned fund balance within the General Fund.

NOTE 10 - RISK FINANCING

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Town carries commercial insurance. The amount of claim settlements has not exceeded insurance coverage in any of the previous three years.

The Town is self-insured for its health insurance. The health insurance activities are accounted for in the internal service fund. Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). The result of the process to estimate the claims liability is not an exact amount as it depends on many factors. Accordingly, claims are reevaluated periodically to consider the effects of inflation, recent claims settlement trends, and other economic and social factors. The Town has recorded an estimated IBNR liability of \$661,000 in the current year.

The Town is also a member of the Massachusetts Interlocal Insurance Association (MIIA), a public entity risk pool currently operating as a common risk management and insurance program for workers; compensation benefits for employees other than uniformed police and fire personnel. MIIA is self-sustaining through member premiums and reinsures through commercial companies for stop loss insurance. Workers' compensation activities are accounted for in the general fund. The liability for workers compensation was not material at June 30, 2018, and therefore is not reported.

NOTE 11 - PENSION PLAN

General Information about the Pension Plan

Plan Descriptions

The Town is a member of the Milton Contributory Retirement System (MCRS), a cost-sharing multiple-employer defined benefit pension plan covering eligible employees of the two member units. The MCRS is administered by a five board members (Board) on behalf of all current employees and retirees except for current teachers and retired teachers. Chapter 32 of the MGL assigns authority to establish and amend benefit provisions of the plan. The MCRS is a component unit and is reported as a pension trust fund in the fiduciary fund financial statements.

The Town is a member of the Massachusetts Teachers' Retirement System (MTRS), a cost-sharing multi-employer defined benefit plan. MTRS is managed by the Commonwealth of Massachusetts (Commonwealth) on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a nonemployer contributor and is responsible for 100% of the contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts, charter schools, educational collaboratives and Quincy College. The MTRS is part of the Commonwealth's reporting entity and the audited financial report may be obtained by visiting <http://www.mass.gov/osc/publications-and-reports/financial-reports/>.

Special Funding Situation

The Commonwealth is a nonemployer contributor and is required by statute to make 100% of all actuarially determined employer contributions on behalf of the Town to the MTRS. Therefore, the Town is considered to be in a special funding situation as defined by GASB Statement No. 68, *Accounting and Financial Reporting for Pensions* and the Commonwealth is a nonemployer contributor in MTRS. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. The total of the Commonwealth provided contributions have been allocated based on each employer's covered payroll to the total covered payroll of employers in MTRS as of the measurement date of June 30, 2017. The Town's portion of the collective pension expense, contributed by the Commonwealth, of \$10,788,680 is reported in the general fund as intergovernmental revenue and pension benefits in the current fiscal year. The portion of the Commonwealth's collective net pension liability associated with the Town is \$103,366,666 as of the measurement date.

Benefits Provided

Both Systems provide retirement, disability, survivor and death benefits to plan members and beneficiaries. Massachusetts Contributory Retirement System benefits are, with certain minor exceptions, uniform from system to system. The Systems provide retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation. For persons who became members on or after April 2, 2012, average salary is the average annual rate of regular compensation received during the five consecutive years that produce the highest average, or, if greater, during the last five years (whether or not consecutive) preceding retirement. Benefit payments are based upon a member's age, length of creditable service, level of compensation, and group classification. Members become vested after ten years of creditable service.

Employees who resign from service and who are not eligible to receive a retirement allowance or are under the age of 55 are entitled to request a refund of their accumulated total deductions. Survivor benefits are extended to eligible beneficiaries of members whose death occurs prior to or following retirement.

Cost-of-living adjustments granted between 1981 and 1997 and any increase in other benefits imposed by the Commonwealth's state law during those years are borne by the Commonwealth and are deposited into the pension fund. Cost-of-living adjustments granted after 1997 must be approved by the Board and are borne by the System.

There were no changes of benefit term that affected the total pension liability at December 31, 2017.

At December 31, 2017, the MCRS's membership consists of the following:

Active members.....	377
Inactive members.....	96
Retirees and beneficiaries currently receiving benefits.....	<u>273</u>
 Total.....	 <u>746</u>

Contributions

Chapter 32 of the MGL governs the contributions of plan members and member units. Active plan members are required to contribute at rates ranging from 5% to 9% of gross regular compensation with an additional 2% contribution required for compensation exceeding \$30,000. The percentage rate is keyed to the date upon which an employee's membership commences. The member units are required to pay into the MCRS a legislatively mandated actuarial determined contribution that is apportioned among the employers based on active current payroll. The total member units' contribution for the year ended December 31, 2017, was \$5,935,000, 27.51% of covered payroll, actuarially determined as an amount that, when combined with plan member contributions, is expected to finance the costs of benefits earned by plan members during the year, with an additional amount to finance any unfunded accrued liability. The Town's proportionate share of the required contribution was \$5,907,000, which equaled its actual contribution.

Pension Liabilities

The components of the net pension liability of the participating member units at June 30, 2018 were as follows:

Total pension liability.....	\$ 151,460,000
Total pension plan's fiduciary net position.....	<u>(135,082,000)</u>
Total net pension liability.....	\$ <u>16,378,000</u>
The pension plan's fiduciary net position as a percentage of the total pension liability.....	89.19%

At June 30, 2018, the Town reported a liability of \$16,299,000 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2017. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to

the pension plan relative to the projected contributions of all participating members. At December 31, 2017, the Town's proportion was 99.52%, which changed from the prior year rate of 99.56%.

Pension Expense

For the year ended June 30, 2018, the Town recognized pension expense of \$3,187,000. At June 30, 2018, the Town reported deferred outflows of resources related to pensions of \$4,474,000, and reported deferred inflows of resources related to pensions of \$10,229,000.

The balance of deferred outflows and inflows at June 30, 2018 consisted of the following:

Deferred Category	Deferred Outflows of Resources	Deferred Inflows of Resources	Total
Differences between expected and actual experience.....	\$ -	\$ (4,661,000)	\$ (4,661,000)
Difference between projected and actual earnings.....	-	(5,562,000)	(5,562,000)
Changes in assumptions.....	4,474,000	-	4,474,000
Changes in proportion and proportionate share of contributions.....	-	(6,000)	(6,000)
 Total deferred outflows/(inflows) of resources.....	 \$ 4,474,000	 \$ (10,229,000)	 \$ (5,755,000)

The deferred outflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30:

2018.....	\$ (341,000)
2019.....	(396,000)
2020.....	(2,332,000)
2021.....	(2,559,000)
2022.....	(127,000)
 \$	 <u>(5,755,000)</u>

Actuarial Assumptions

The total pension liability in the January 1, 2017, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement that was updated to December 31, 2017:

Valuation date.....	January 1, 2017
Actuarial cost method.....	Entry Age Normal
Amortization method - UAAL.....	Total appropriation increases 6.0% per year until 2024 with a final amortization payment in 2025
Remaining amortization period.....	7 Years from July 1, 2018
Asset valuation method.....	The Actuarial Value of Assets is the market value of assets as of the valuation date reduced by the sum of: a) 20% of gains and losses of the prior year, b) 40% of gains and losses of the second prior year and etc., so that 100% gains or losses occurring 5 years ago are recognized. Investment gains and losses are determined by the excess or deficiency of the expected return over the actual return on the market value. The actuarial valuation of assets is further constrained to be not less than 90% or more than 110% of market value.

Investment rate of return.....	7.5%, net of pension plan investment expense, including inflation
Discount rate.....	7.50%
Inflation rate.....	Not explicitly assumed
Projected salary increases.....	Groups 1/2: 6% to 4.25% based on service. Group 4: 7% to 4.75% based on service
Cost of living adjustments.....	3% of the first \$15,000
Mortality rates.....	Pre-retirement rates reflect the RP-2000 Employees table projected generationally with Scale BB and a base year of 2009.
	Post-retirement rates reflect the RP-2000 Healthy Annuitant table projected generationally with Scale BB and a base year of 2009.
	For disabled retirees, the rates reflect the RP-2000 Healthy Annuitant table projected generationally with Scale BB and a base year of 2012.

Investment policy

The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the Board. Plan assets are managed on a total return basis with a long-term objective of achieving a fully funded status for the benefits provided through the pension plan.

The long-term expected rate of return on pension plan investments was determined by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of January 1, 2017, are summarized in the following table:

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Global equity		
Large cap equities.....	14.50%	7.50%
Small/mid cap equities.....	3.50%	7.75%
International equities.....	16.00%	7.80%
Emerging international equities.....	6.00%	9.30%
Core fixed income		
Core bonds.....	5.00%	3.75%
20+ yr. treasury strips.....	2.00%	3.50%
TIPS.....	5.00%	3.75%
Value added fixed income		
High-yield bonds.....	1.50%	5.50%
Bank loans.....	2.50%	5.50%
EMD (external).....	1.00%	5.00%
EMD (local currency).....	0.00%	6.50%
Distressed debt.....	3.00%	8.80%
Other credit opportunities.....	2.00%	6.50%
Private equity.....	11.00%	9.50%
Real estate.....	10.00%	6.70%
Timberland.....	4.00%	6.25%
Hedge fund and portfolio completion.....	13.00%	6.40%
Total.....	<u><u>100.00%</u></u>	

Rate of return

For the year ended December 31, 2017, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 17.19%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Discount rate

The discount rate used to measure the total pension liability was 7.5%. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that contributions will be made at rates equal to the actuarially determined contribution rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net position liability to changes in the discount rate

The following presents the net position liability, calculated using the discount rate of 7.5%, as well as what the net position liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.5%) or 1-percentage-point higher (8.5%) than the current rate:

	December 31, 2017 Measurement Date		
	1% Decrease (6.5%)	Current Discount (7.5%)	1% Increase (8.5%)
The Town's proportionate share of the net pension liability.....	\$ 33,487,000	\$ 16,378,000	\$ 1,897,000

Changes of Assumptions – The discount rate decreased to 7.5% from 7.75%.

Changes in Plan Provisions – None.

NOTE 12 – POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS

Plan Description – The Town of Milton administers a single-employer defined benefit healthcare plan (Plan). The plan provides lifetime healthcare insurance for eligible retirees and their spouses through the Town's group health insurance plan, which covers both active and retired members. Chapter 32B of the MGL assigns authority to establish and amend benefit provisions of the plan. Benefit provisions are negotiated between the Town and the unions representing Town employees and are renegotiated each bargaining period. The Plan does not issue a publicly available financial report.

Funding Policy – Contribution requirements are also negotiated between the Town and union representatives. The required contribution is based on a pay-as-you-go financing requirement. The Town contributes 70% of the general government's and 95% of the School's cost of the current-year premiums for eligible retired plan members and their spouses. Plan members receiving benefits contribute the remaining 5 or 30% of the premium. For the year ended June 30, 2018, The Town's average contribution rate was 5.65% of covered-employee payroll.

The Commonwealth of Massachusetts passed special legislation that has allowed the Town to establish the other postemployment benefit trust fund to begin pre-funding its OPEB liabilities. During 2018, the Town pre-funded

future OPEB liabilities totaling \$150,388 by contributing funds to the OPEB trust fund in excess of the pay-as-you-go required contribution. These funds are reported within the Fiduciary Fund financial statements. As of June 30, 2018, the net position of the OPEB trust fund totaled \$985,818.

Investment policy – The Town's policy in regard to the allocation of invested assets is established and may be amended by the Board of Selectmen by a majority vote of its members. The OPEB plan's assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the OPEB plan. The long-term real rate of return on OPEB investments was determined using the Town's investment policy.

GASB Statement #74 – OPEB Plan Financial Reporting

Measurement Date – GASB #74 requires the net OPEB liability to be measured as of the OPEB Plan's most recent fiscal year-end. Accordingly, the net OPEB liability was measured as of June 30, 2018, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2016.

Employees Covered by Benefit Terms – The following table represents the Plan's membership at June 30, 2018:

Active members.....	772
Inactive members currently receiving benefits.....	<u>576</u>
Total.....	<u><u>1,348</u></u>

Components of OPEB Liability – The following table represents the components of the Plan's OPEB liability as of June 30, 2018:

Total OPEB liability.....	\$ 132,683,840
Less: OPEB plan's fiduciary net position.....	<u>(985,818)</u>
Net OPEB liability.....	<u><u>\$ 131,698,022</u></u>
The OPEB plan's fiduciary net position as a percentage of the total OPEB liability.....	0.74%

Significant Actuarial Methods and Assumptions – The total OPEB liability in the June 30, 2016, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified, that was updated to June 30, 2018, to be in accordance with GASB Statement #74 as follows:

Valuation date.....	June 30, 2016
Actuarial cost method.....	Individual Entry Age Normal Cost Method.
Asset valuation method.....	Market value of assets as of the reporting date.
Investment rate of return.....	7.04%, net of OPEB plan investment expense, including inflation.
Discount rate.....	3.75%
Municipal bond rate.....	3.45% as of June 30, 2018 (source: S&P Municipal bond 20-Year High Grade Index-SAPIHG)
Inflation rate.....	2.75% as of June 30, 2018 and for future periods.
Salary increases.....	3.00% annually as of June 30, 2018 and for future periods.
Pre-retirement mortality.....	RP-2000 Employees Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Post-retirement mortality.....	RP-2000 Healthy Annuitant Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Disabled mortality.....	RP-2000 Healthy Annuitant Table projected generationally with scale BB and a base year 2012 for males and females.
Mortality experience study.....	The mortality assumptions reflect PERAC's recent experience analysis published in 2014 (based on years 2006-2011), updated to reflect data through January 1, 2015 for post-retirement mortality, and professional judgement. As such, mortality assumptions reflect observed current mortality as well as expected mortality improvements.

Rate of return – For the year ended June 30, 2018, the annual money-weighted rate of return on investments, net of investment expense, was 8.88%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return of by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The Plan's expected future real rate of return of 4.79% is added to the expected inflation of 2.75% to produce the long-term expected nominal rate of return of 7.54%.

Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plan's target asset allocation as of June 30, 2018 are summarized in the following table below:

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Domestic Equity - Large Cap.....	14.50%	4.00%
Domestic Equity - Small/Mid Cap.....	3.50%	6.00%
International Equity - Developed Market....	16.00%	4.50%
International Equity - Emerging Market.....	6.00%	7.00%
Domestic Fixed Income.....	20.00%	2.00%
International Fixed Income.....	3.00%	3.00%
Alternatives.....	23.00%	6.50%
Real estate.....	14.00%	6.25%
Total.....	100.00%	

Discount rate – The discount rate used to measure the total OPEB liability was 3.75% as of June 30, 2018 and 3.50% as of June 30, 2017. The projection of cash flows used to determine the discount rate assumed that contributions will be made in accordance with the Plan's funding policy. Based on those assumptions, the OPEB plan's fiduciary net position was projected to be insufficient to make all projected benefit payments to current plan members. Therefore the long-term expected rate of return on the OPEB plan assets was applied to all periods of projected future benefits payments to determine the total OPEB liability.

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate – The following table presents the net other postemployment benefit liability and service cost, calculated using the discount rate of 3.75%, as well as what the net other postemployment benefit liability and service cost would be if it were calculated using a discount rate that is 1-percentage-point lower (2.75%) or 1-percentage-point higher (4.75%) than the current rate.

	Current		
	1% Decrease (2.75%)	Discount Rate (3.75%)	1% Increase (4.75%)
Net OPEB liability.....	\$ 159,850,154	\$ 131,698,022	\$ 111,197,707

Sensitivity of the net OPEB liability to changes in the healthcare trend — The following table presents the net other postemployment benefit liability, calculated the healthcare trend rate if it was is 1-percentage-point lower (4.0%) or 1-percentage-point higher (6.0%) than the current rate.

	Current Trend		
	1% Decrease (4.00%)	Current Trend (5.00%)	1% Increase (6.00%)
Net OPEB liability.....	\$ 103,493,254	\$ 131,698,022	\$ 169,243,509

Changes of Assumptions – The discount rate is 3.75%, previously 3.50%

Changes in Plan Provisions – None.

GASB Statement #75 – OPEB Employer Financial Reporting

Summary of Significant Accounting Policies – For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Plan and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, the Plan recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts (repurchase agreements) that have a maturity at the time of purchase of one year or less, which are reported at cost.

Measurement Date – GASB Statement #75 requires the net OPEB liability to be measured as of a date no earlier than the end of the employer's prior fiscal year and no later than the end of the employer's current fiscal year, consistently applied from period to period. Accordingly, the net OPEB liability was measured as of June 30, 2017, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2016.

Plan Membership – The following table represents the Plan's membership at June 30, 2017:

Active members.....	772
Inactive employees or beneficiaries currently receiving benefits.....	<u>576</u>
Total.....	<u><u>1,348</u></u>

Significant Actuarial Methods and Assumptions – The total OPEB liability in the June 30, 2016, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified, that was updated to June 30, 2017, to be in accordance with GASB Statement #75:

Valuation date.....	June 30, 2016
Actuarial cost method.....	Individual Entry Age Normal Cost Method.
Asset valuation method.....	Market Value of Assets as of the Measurement Date
Investment rate of return.....	7.04%, net of OPEB plan investment expense, including inflation.
Single equivalent discount rate.....	3.50%, net of OPEB plan investment expense, including inflation.
Inflation rate.....	2.75% as of July 1, 2017 and for future periods.
Salary increase.....	3.00% annually as of July 1, 2017 and for future periods.
Long term rate of return.....	7.04%
Municipal bond rate.....	3.13% as of July 1, 2017 (source: S&P Municipal Bond 20-Year High Grade Index-SAPIHG)
Discount rate.....	3.50%

Mortality rates:

Pre-Retirement Mortality.....	RP-2000 Employees Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Post-Retirement Mortality.....	RP-2000 Healthy Annuitant Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Disabled Mortality.....	RP-2000 Healthy Annuitant Table projected generationally with Scale BB and a base year 2012 for males and females.
Disabled Mortality.....	The mortality assumptions reflect PERAC's recent experience analysis published in 2014 (based on the years 2006-2011), updated to reflect data through January 1, 2015 for post-retirement mortality, and professional judgement. As such, mortality assumptions reflect observed current mortality as well as expected mortality improvements.

Rate of return – For the year ended June 30, 2018, the annual money-weighted rate of return on investments, net of investment expense, was 10.93%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return of by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation as of June 30, 2017, and projected arithmetic real rates of return for each major class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumptions are summarized below:

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Domestic Equity - Large Cap.....	14.50%	4.00%
Domestic Equity - Small/Mid Cap.....	3.50%	6.00%
International Equity - Developed Market.....	16.00%	4.50%
International Equity - Emerging Market.....	6.00%	7.00%
Domestic Fixed Income.....	20.00%	2.00%
International Fixed Income.....	3.00%	3.00%
Alternatives.....	23.00%	6.50%
Real estate.....	14.00%	6.25%
Total.....	100.00%	

Discount rate – The discount rate used to measure the total OPEB liability was 3.50% as of June 30, 2017. The projection of cash flows used to determine the discount rate assumed that contributions will be made in accordance with the Plan's funding policy. Based on those assumptions, the OPEB plan's fiduciary net position was projected to be insufficient to make all projected benefit payments to current plan members.

NOTE 14 - COMMITMENTS

The Town is committed to expend \$11,699,559 for the various projects listed below.

Purpose	Amount
Sewer capital needs.....	\$ 28,000
Various capital.....	150,000
Water rehab (MWRA).....	1,000,000
Sewer capital needs.....	218,250
Surface drains.....	400,000
Various capital.....	345,000
Sewer.....	485,000
Sewer enterprise mech rodding.....	18,000
Stormwater drains.....	300,000
Town new genie lift.....	4,000
Tech server hardware replacement.....	17,500
Roadway Ch.90.....	1,873,633
DPW 3/4 ton utility truck.....	40,000
DPW dump truck.....	171,000
DPW backhoe.....	120,000
DPW wood chipper.....	65,000
DPW sidewalk paver.....	32,000
Roadway construction.....	1,000,000
Giles Rd basketball court.....	175,000
Park pickup truck.....	40,000
Police radio replacement phase 2.....	130,601
Police front parking lot improvements.....	60,000
Town Hall paving/curbing/drainage.....	40,000
Traffic signal equipment.....	100,000
Squantum at Adams St Signalization.....	1,187,075
Sidewalks/Paving improvements.....	100,000
Tucker roof replacement.....	270,000
School Paving/concrete and curb repairs.....	100,000
Water meter replacements.....	250,000
Sewer meter replacements.....	250,000
Sewer pump station replacement.....	300,000
Sewer emergency generator.....	50,000
Stormwater street sweeper.....	230,000
School science wing roof repair.....	50,000
Sewer system (MWRA).....	685,500
Water bonds.....	500,000
Sewer bonds.....	914,000
 Total.....	 <u>\$ 11,699,559</u>

NOTE 15 - CONTINGENCIES

The Town participates in a number of federal award programs. Although the grant programs have been audited in accordance with the provisions of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards through June 30, 2018, these programs are still subject to financial and compliance audits. The amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although it is expected such amounts, if any, to be immaterial.

Various legal actions and claims are pending. Litigation is subject to many uncertainties, and the outcome of individual litigated matters is not always predictable. Although the amount of liability, if any, at June 30, 2018, cannot be ascertained, management believes any resulting liability should not materially affect the financial position at June 30, 2018.

NOTE 16 – REVISION OF NET POSITION PREVIOUSLY REPORTED

NOTE 17 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through December 21, 2018, which is the date the financial statements were available to be issued.

NOTE 18 - IMPLEMENTATION OF NEW GASB PRONOUNCEMENTS

During 2018, the following GASB pronouncements were implemented:

- GASB Statement #75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. The basic financial statements, related notes and required supplementary information were updated to be in compliance with this pronouncement.
- GASB Statement #81, Irrevocable Split-Interest Agreements. This pronouncement did not impact the basic financial statements.
- GASB Statement #85, Omnibus 2017. This pronouncement did not impact the basic financial statements.

- GASB Statement #86, Certain Debt Extinguishment Issues. This pronouncement did not impact the basic financial statements.

The following GASB pronouncements will be implemented in the future:

- The GASB issued Statement #83, Certain Asset Retirement Obligations, which is required to be implemented in 2019.
- The GASB issued Statement #84, Fiduciary Activities, which is required to be implemented in 2019.
- The GASB issued Statement #87, Leases, which is required to be implemented in 2021.
- The GASB issued Statement #88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements, which is required to be implemented in 2019.
- The GASB issued Statement #89, Accounting for Interest Cost Incurred before the End of a Construction Period, which is required to be implemented in 2021.
- The GASB issued Statement #90, Majority Equity Interests – an amendment of GASB Statements #14 and #61, which is required to be implemented in 2020.

Management is currently assessing the impact the implementation of these pronouncements will have on the basic financial statements.

Required Supplementary Information

General Fund Budgetary Schedule

The General Fund is the general operating fund of the Town. It is used to account for all the financial resources, except those required to be accounted for in another fund.

Pension Plan Schedules

Retirement System

The Pension Plan's Schedule of Changes in the Net Pension Liability presents multi-year trend information on the net pension liability and related ratios.

The Pension Plan's Schedule of Contributions presents multi-year trend information on the required and actual contributions to the pension plan and related ratios.

The Pension Plan's Schedule of Investment Return presents multi-year trend information on the money-weighted investment return on retirement assets, net of investment expense.

These schedules are intended to present information for ten years. Until a ten year trend is compiled, information is presented for those years for which information is available.

Note: this schedule is intended to present information for 10 years.

Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

**SCHEDULE OF THE SPECIAL FUNDING AMOUNTS
OF THE NET PENSION LIABILITY
MASSACHUSETTS TEACHERS' RETIREMENT SYSTEM**

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding situation. Therefore, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the associated collective net pension liability; the portion of the collective pension expense as both a revenue and pension expense recognized; and the Plan's fiduciary net position as a percentage of the total liability.

Year	Commonwealth's 100% Share of the Associated Net Pension Liability	Expense and Revenue Recognized for the Commonwealth's Support	Plan Fiduciary Net Position as a Percentage of the Total Liability
2018.....	\$ 103,366,666	\$ 10,788,680	54.25%
2017.....	100,281,611	10,229,382	52.73%
2016.....	93,204,677	7,559,729	55.38%
2015.....	69,895,000	4,855,948	61.64%

Note: this schedule is intended to present information for 10 years.

Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

Other Postemployment Benefits Plan Schedules

The Schedule of Changes in the Town's Net Other Postemployment Benefit Liability and Related Ratios presents multi-year trend information on changes in the Plan's total OPEB liability, changes in the Plan's net position, and ending net OPEB liability. It also demonstrates the Plan's net position as a percentage of the total liability and the Plan's net other postemployment benefit liability as a percentage of covered-employee payroll.

The Schedule of the Town's Contributions presents multi-year trend information on the Town's actual contributions to the other postemployment benefit plan and related ratios.

The Schedule of Investment Returns presents multi-year trend information on the money-weighted investment return on the Plan's other postemployment assets, net of investment expense.

**SCHEDULE OF CHANGES IN THE
TOWN'S NET OPEB LIABILITY AND RELATED RATIOS

June 30, 2017.....	8.12%

Note: this schedule is intended to present information for 10 years. Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

NOTE A - BUDGETARY BASIS OF ACCOUNTING**1. Budgetary Information**

Municipal Law requires the adoption of a balanced budget that is approved by the Warrant Committee. The Warrant Committee presents an annual budget to the Town Meeting Representatives (Representatives), which includes estimates of revenues and other financing sources and recommendations of expenditures and other financing uses. The Representatives, who have full authority to amend and/or reject the budget or any line item, adopts the expenditure budget by majority vote.

Increases or transfers between and within departments subsequent to the approval of the annual budget, requires majority Representative approval via a supplemental appropriation.

The majority of appropriations are non-continuing which lapse at the end of each year. Others are continuing appropriations for which the governing body has authorized that an unspent balance from a prior year be carried forward and made available for spending in the current year. These carry forwards are included as part of the subsequent year's original budget.

Generally, expenditures may not exceed the legal level of spending (salaries, expenses and capital) authorized for an appropriation account. However, the payment of debt service is statutorily required, regardless of whether such amounts are appropriated. Additionally, expenditures for disasters, natural or otherwise, and final judgments may exceed the level of spending authorized by majority vote of the Representatives.

An annual budget is adopted for the general fund in conformity with the guidelines described above. The original year 2018 approved budget authorized approximately \$101.7 million in appropriations and other amounts to be raised. Included in this amount were carry forwards from prior years and continuing appropriations. The Town Accountant's Office has the responsibility to ensure that budgetary control is maintained. Budgetary control is exercised through the accounting system.

2. Budgetary - GAAP Reconciliation

For budgetary financial reporting purposes, the Uniform Municipal Accounting System basis of accounting (established by the Commonwealth) is followed, which differs from the GAAP basis of accounting. A reconciliation of budgetary-basis to GAAP-basis results for the general fund for the year ended June 30, 2018, is presented below:

Net change in fund balance - budgetary basis.....	\$ (94,094)
<u>Perspective differences:</u>	
Activity of the stabilization fund recorded in the general fund for GAAP.....	(409,262)
<u>Basis of accounting differences:</u>	
Net change in recording tax refunds payable.....	(24,000)
Net change in recording 60 day receipts.....	(108,975)
Recognition of revenue for on-behalf payments.....	10,788,680
Recognition of expenditures for on-behalf payments.....	<u>(10,788,680)</u>
Net change in fund balance - GAAP basis.....	\$ <u><u>(636,331)</u></u>

3. Appropriation Deficits

During 2018, expenditures exceeded the budgeted appropriation for state and county charges. This deficit will be funded through tax levy and available funds in 2019.

NOTE B – PENSION PLAN

Pension Plan Schedules – Retirement System

A. Schedule of Changes in the Net Pension Liability and Related Ratios

The Schedule of Changes in the Net Pension Liability and Related Ratios includes the detailed changes in the systems total pension liability, changes in the systems net position, and the ending net pension liability. It also demonstrates the plan's net position as a percentage of the total pension liability and the net pension liability as a percentage of covered payroll.

B. Schedule of Contributions

Governmental employers are required to pay an annual appropriation as established by PERAC. The total appropriation includes the amounts to pay the pension portion of each member's retirement allowance, an amount to amortize the actuarially determined unfunded liability to zero in accordance with the system's funding schedule, and additional appropriations in accordance with adopted early retirement incentive programs. The total appropriations are payable on July 1 and January 1. Employers may choose to pay the entire appropriation in July at a discounted rate. Accordingly, actual employer contributions may be less than the "total appropriation". The pension fund appropriations are allocated amongst employers based on covered payroll.

C. Schedule of Investment Return

The money weighted rate of return is calculated as the internal rate of return on pension plan investments, net of pension plan investment expense. A money weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested. Inputs to the money weighted rate of return calculation are determined monthly.

Pension Plan Schedules - Town

A. Schedule of the Town's Proportionate Share of the Net Pension Liability

The Schedule of the Town's Proportionate Share of the Net Pension Liability details the Town's allocated percentage of the net pension liability (asset), the Town's proportionate share of the net pension liability, and the Town's covered employee payroll. It also demonstrates the Town's net position as a percentage of the Town's pension liability and the Town's net pension liability as a percentage of Town's covered payroll.

B. Schedule of Town's Contributions

Governmental employers are required to pay an annual appropriation as established by PERAC. The Town's appropriation includes the amounts to pay the pension portion of each member's retirement allowance, an amount to amortize the actuarially determined unfunded liability to zero in accordance with the system's funding schedule, and additional appropriations in accordance with adopted early retirement incentive programs. The Town's appropriations are payable on July 1 and January 1. The Town may choose to pay the entire appropriation in July at a discounted rate. Accordingly, actual Town contributions may be less than the "total appropriation". The pension fund appropriation is allocated to the Town based on covered payroll.

C. Schedule of the Special Funding Amounts of the Net Pension Liabilities

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding situation. Since the City does not contribute directly to MTRS, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the collective net pension liability that is associated with the Town; the portion of the collective pension expense as both revenue and pension expense recognized by the Town; and the Plan's fiduciary net position as a percentage of the total liability.

D. Changes in Assumptions

The discount rate decreased to 7.5% from 7.75%.

E. Changes in Plan Provisions

None.

NOTE C – OTHER POSTEMPLOYMENT BENEFITS

The Town administers a single-employer defined benefit healthcare plan (“The Plan”). The plan provides lifetime healthcare insurance for eligible retirees and their spouses through the Town’s group health insurance plan, which covers both active and retired members. Additionally, retired teachers and their spouses receive health insurance through the Group Insurance Commission of the Commonwealth of Massachusetts (GIC). Each participating municipality is assessed for the governmental share of health and life insurance premiums paid on behalf of its teacher retirees by the state.

The Other Postemployment Benefit PlanThe Schedule of Changes in the Town’s Net Other Postemployment Benefit Liability and Related Ratios

The Schedule of Changes in the Town’s Net Other Postemployment Benefit Liability and Related Ratios presents multi-year trend information on changes in the Plan’s total OPEB liability, changes in the Plan’s net position, and ending net OPEB liability. It also demonstrates the Plan’s net position as a percentage of the total liability and the Plan’s net other postemployment benefit liability as a percentage of covered-employee payroll.

Schedule of the Town’s Contributions

The Schedule of the Town’s Contributions includes the Town’s annual required contribution to the Plan, along with the contribution made in relation to the actuarially determined contribution and the covered-employee payroll. The Town is not required to fully fund this contribution. It also demonstrates the contributions as a percentage of covered-employee payroll. Actuarially contribution rates are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported.

Methods and assumptions used to determine contribution rates are as follows:

Valuation date.....	June 30, 2016
Actuarial cost method.....	Individual Entry Age Normal Cost Method.
Asset valuation method.....	Market value of assets as of the reporting date.
Investment rate of return.....	7.04%, net of OPEB plan investment expense, including inflation.
Discount rate.....	3.75%
Municipal bond rate.....	3.45% as of June 30, 2018 (source: S&P Municipal bond 20-Year High Grade Index-SAPIHG)
Inflation rate.....	2.75% as of June 30, 2018 and for future periods.
Salary increases.....	3.00% annually as of June 30, 2018 and for future periods.
Pre-retirement mortality.....	RP-2000 Employees Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Post-retirement mortality.....	RP-2000 Healthy Annuitant Mortality Table projected generationally with scale BB and a base year 2009 for males and females.
Disabled mortality.....	RP-2000 Healthy Annuitant Table projected generationally with scale BB and a base year 2012 for males and females.
Mortality experience study.....	The mortality assumptions reflect PERAC's recent experience analysis published in 2014 (based on years 2006-2011), updated to reflect data through January 1, 2015 for post-retirement mortality, and professional judgement. As such, mortality assumptions reflect observed current mortality as well as expected mortality improvements.

Schedule of Investment Returns

The Schedule of Investment Return includes the money-weighted investment return on the Plan's other postemployment assets, net of investment expense.

Changes of Assumptions

The discount rate is 3.75%, previously 3.50%.

Changes in Provisions

None.
