

Massachusetts Department of Public Health

Arbovirus Surveillance Program Report

Key Public Risk Communication Messages for This Week:

MDPH has identified seven WNV human cases in Bristol, Essex and Middlesex Counties. Additionally, MDPH has identified 133 West Nile virus positive mosquito samples collected in Barnstable, Berkshire, Bristol, Essex, Franklin, Hampden, Hampshire, Middlesex, Norfolk, Plymouth and Suffolk Counties. The populations of mosquito vectors that transmits WNV and EEE are elevated due to intense regional precipitation events and average temperatures. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps.

Check your risk levels throughout the season by visiting our interactive site <https://www.mass.gov/info-details/massachusetts-arbovirus-update> For a detailed list of findings in your community select [Arbovirus Results Summary](#) on the main page.

Please review the 2021 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging. <https://www.mass.gov/doc/2021-arbovirus-surveillance-and-response-plan/download>

WNV and EEE Virus Surveillance Summary Results contained in this report reflect data inclusive of MMWR Week 38 (Sunday, 09/19/2021-Saturday, 09/25/2021)	
Mosquito Surveillance	
Number of Mosquito Samples Tested	8218
Number of WNV Positive Samples	133
Number of EEE Positive Samples	0
Equine/Mammal Surveillance	
Number of Mammal Specimens Tested	10
Number of WNV Positive Horses	0
Number of EEE Positive Horses	0
Number of other EEE Positive Mammals	1
Human Surveillance	
Number of Human Specimens Tested	166
Number of Human WNV Cases	7
Number of Human EEE Cases	0
