

To see if the Town will vote to amend Chapter 10 of the General Bylaws, known as the Zoning Bylaws, as follows:

***Section I. Definitions* is hereby amended by adding the following definitions:**

Absolute Photometry: Photometric measurements (usually of a solid-state luminaire) that directly measures the footprint of the luminaire. Reference Standard IES LM-79

Architectural Lighting: Lighting designed to reveal architectural beauty, shape and/or form and for which lighting for any other purpose is incidental.

Authority: The adopting municipality, agency or other governing body.

Astronomic Time Switch: An automatic lighting control device that switches outdoor lighting relative to time of solar day with time of year correction.

Backlight: For an exterior luminaire, lumens emitted in the quarter sphere below horizontal and in the opposite direction of the intended orientation of the luminaire. For luminaires with symmetric distribution, backlight will be the same as front light.

BUG: A luminaire classification system that classifies backlight (B), uplight (U) and glare (G).

Canopy: A covered, unconditioned structure with at least one side open for pedestrian and/or vehicular access. (An unconditioned structure is one that may be open to the elements and has no heat or air conditioning.)

Common Outdoor Areas: One or more of the following: a parking lot; a parking structure or covered vehicular entrance; a common entrance or public space shared by all occupants of the domiciles.

Curfew: A time defined by the authority when outdoor lighting is reduced or extinguished.

Emergency Conditions: Generally, lighting that is only energized during an emergency; lighting fed from a backup power source; or lighting for illuminating the path of egress solely during a fire or other emergency situation; or, lighting for security purposes used solely during an alarm.

Footcandle: The unit of measure expressing the quantity of light received on a surface. One footcandle is the illuminance produced by a candle on a surface one foot square from a distance of one foot.

Forward Light: For an exterior luminaire, lumens emitted in the quarter sphere below horizontal and in the direction of the intended orientation of the luminaire.

Fully Shielded Luminaire: A luminaire constructed and installed in such a manner that all light emitted by the luminaire, either directly from the lamp or a diffusing element, or indirectly by reflection or refraction from any part of the luminaire, is projected below the horizontal plane through the luminaire's lowest light-emitting part.

Glare: Lighting entering the eye directly from luminaires or indirectly from reflective surfaces that causes visual discomfort or reduced visibility.

Hardscape: Permanent hardscape improvements to the site including parking lots, drives, entrances, curbs, ramps, stairs, steps, medians, walkways and non-vegetated landscaping that is 10 feet or less in width. Materials may include concrete, asphalt, stone, gravel, etc.

Hardscape Area: The area measured in square feet of all hardscape. It is used to calculate the Total Site Lumen Limit in both the Prescriptive Method and Performance Methods. Refer to Hardscape definition.

Hardscape Perimeter: The perimeter measured in linear feet is used to calculate the Total Site Lumen Limit in the Performance Method. Refer to Hardscape definition.

IDA: International Dark-Sky Association.

IESNA: Illuminating Engineering Society of North America.

Impervious Material: Sealed to severely restrict water entry and movement

Industry Standard Lighting Software: Lighting software that calculates point-by-point illuminance that includes reflected light using either ray-tracing or radiosity methods.

Lamp: A generic term for a source of optical radiation (i.e. "light"), often called a "bulb" or "tube". Examples include incandescent, fluorescent, high-intensity discharge (HID) lamps, and low pressure sodium (LPS) lamps, as well as light-emitting diode (LED) modules and arrays.

Landscape Lighting: Lighting of trees, shrubs, or other plant material as well as ponds and other landscape features.

LED: Light Emitting Diode.

Light Pollution: Any adverse effect of artificial light including, but not limited to, glare, light trespass, skyglow, energy waste, compromised safety and security, and impacts on the nocturnal environment.

Light Trespass: Light that falls beyond the property it is intended to illuminate.

Lighting: “Electric” or “man-made” or “artificial” lighting. See “lighting equipment”.

Lighting Equipment: Equipment specifically intended to provide gas or electric illumination, including but not limited to, lamp(s), luminaire(s), ballast(s), poles, posts, lens(s), and related structures, electrical wiring, and other necessary or auxiliary components.

Lighting Zone: An overlay zoning system establishing legal limits for lighting for particular parcels, areas, or districts in a community.

Low Voltage Landscape Lighting: Landscape lighting powered at less than 15 volts and limited to luminaires having a rated initial luminaire lumen output of 525 lumens or less.

Lumen: The unit of measure used to quantify the amount of light produced by a lamp or emitted from a luminaire (as distinct from “watt,” a measure of power consumption).

Luminaire: The complete lighting unit (fixture), consisting of a lamp, or lamps and ballast(s) (when applicable), together with the parts designed to distribute the light (reflector, lens, diffuser), to position and protect the lamps, and to connect the lamps to the power supply.

Luminaire Lumens: For luminaires with relative photometry per IES, it is calculated as the sum of the initial lamp lumens for all lamps within an individual luminaire, multiplied by the luminaire efficiency. If the efficiency is not known for a residential luminaire, assume 70%. For luminaires with absolute photometry per IES LM-79, it is the total luminaire lumens. The lumen rating of a luminaire assumes the lamp or luminaire is new and has not depreciated in light output.

Lux: The SI unit of illuminance. One lux is one lumen per square meter. 1 Lux is a unit of incident illuminance approximately equal to 1/10 footcandle.

Mounting height: The height of the photometric center of a luminaire above grade level.

New lighting: Lighting for areas not previously illuminated; newly installed lighting of any type except for replacement lighting or lighting repairs.

Object: A permanent structure located on a site. Objects may include statues or artwork, garages or canopies, outbuildings, etc.

Object Height: The highest point of an entity, but shall not include antennas or similar structures.

Ornamental lighting: Lighting that does not impact the function and safety of an area but is purely decorative, or used to illuminate architecture and/or landscaping, and installed for aesthetic effect.

Ornamental Street Lighting: A luminaire intended for illuminating streets that serves a decorative function in addition to providing optics that effectively deliver street lighting. It has a historical period appearance or decorative appearance, and has the following design characteristics:

- designed to mount on a pole using an arm, pendant, or vertical tenon;
- opaque or translucent top and/or sides;
- an optical aperture that is either open or enclosed with a flat, sag or drop lens;
- mounted in a fixed position; and with its photometric output measured using Type C photometry per IESNA LM-75-01.

Outdoor Lighting: Lighting equipment installed within the property line and outside the building envelopes, whether attached to poles, building structures, the earth, or any other location; and any associated lighting control equipment.

Partly shielded Luminaire: A luminaire with opaque top and translucent or perforated sides, designed to emit most light downward.

Pedestrian Hardscape: Stone, brick, concrete, asphalt or other similar finished surfaces intended primarily for walking, such as sidewalks and pathways.

Photoelectric Switch: A control device employing a photocell or photodiode to detect daylight and automatically switch lights off when sufficient daylight is available.

Property line: The edges of the legally-defined extent of privately owned property.

Relative photometry: Photometric measurements made of the lamp plus luminaire, and adjusted to allow for light loss due to reflection or absorption within the luminaire.

Reference standard: IES LM-63.

Repair(s): The reconstruction or renewal of any part of an existing luminaire for the purpose of its ongoing operation, other than relamping or replacement of components including capacitor, ballast or photocell. Note that retrofitting a luminaire with new lamp and/or ballast technology is not considered a repair and for the purposes of this ordinance the luminaire shall be treated as if new. "Repair" does not include normal relamping or replacement of components including capacitor, ballast or photocell.

Replacement Lighting: Lighting installed specifically to replace existing lighting that is sufficiently broken to be beyond repair.

Roadway or Highway Lighting: Lighting provided for freeways, expressways, limited access roadways, and roads on which pedestrians, cyclists, and parked vehicles are generally not present. The primary purpose of roadway or highway lighting is to help the motorist remain on the roadway and help with the detection of obstacles within and beyond the range of the vehicle's headlights.

Sales area: Uncovered area used for sales of retail goods and materials, including but not limited to automobiles, boats, tractors and other farm equipment, building supplies, and gardening and nursery products.

Seasonal lighting: Temporary lighting installed and operated in connection with holidays or traditions.

Shielded Directional Luminaire: A luminaire that includes an adjustable mounting device allowing aiming in any direction and contains a shield, louver, or baffle to reduce direct view of the lamp.

Sky Glow: The brightening of the nighttime sky that results from scattering and reflection of artificial light by moisture and dust particles in the atmosphere. Skyglow is caused by light directed or reflected upwards or sideways and reduces one's ability to view the night sky.

Street Lighting: Lighting provided for major, collector, and local roads where pedestrians and cyclists are generally present. The primary purpose of street lighting is to help the motorist identify obstacles, provide adequate visibility of pedestrians and cyclists, and assist in visual search tasks, both on and adjacent to the roadway.

Temporary lighting: Lighting installed and operated for periods not to exceed 60 days, completely removed and not operated again for at least 30 days.

Third Party: A party contracted to provide lighting, such as a utility company

Time Switch: An automatic lighting control device that switches lights according to time of day.

Translucent: Allowing light to pass through, diffusing it so that objects beyond cannot be seen clearly (not transparent or clear).

Unshielded Luminaire: A luminaire capable of emitting light in any direction including downwards.

Uplight: For an exterior luminaire, flux radiated in the hemisphere at or above the horizontal plane.

Vertical Illuminance: Illuminance measured or calculated in a plane perpendicular to the site boundary or property line.

Section III.B.3: Signs and Billboards and Section III.C: Business District Uses Paragraphs 3, 4, and 5 are hereby replaced in full with the following addition to Section VI. Area Regulations Subsection (tbd): Lighting.

I. PREAMBLE

The purpose of this Ordinance is to provide regulations for outdoor lighting that will:

- a. Permit the use of outdoor lighting that does not exceed the minimum levels specified in IES recommended practices for night-time safety, utility, security, productivity, enjoyment, and commerce.
- b. Minimize adverse offsite impacts of lighting such as light trespass, and obtrusive light.
- c. Curtail light pollution, reduce skyglow and improve the nighttime environment for astronomy.
- d. Help protect the natural environment from the adverse effects of night lighting from gas or electric sources.
- e. Conserve energy and resources to the greatest extent possible.

II. LIGHTING ZONES

The Lighting Zone shall determine the limitations for lighting as specified in this ordinance. The Lighting Zones shall be as follows:

LZ0: No ambient lighting

Areas where the natural environment will be seriously and adversely affected by lighting. Impacts include disturbing the biological cycles of flora and fauna and/or detracting from human enjoyment and appreciation of the natural environment. Human activity is subordinate in importance to nature. The vision of human residents and users is adapted to the darkness, and they expect to see little or no lighting. When not needed, lighting should be extinguished.

LZ1: Low ambient lighting

Areas where lighting might adversely affect flora and fauna or disturb the character of the area. The vision of human residents and users is adapted to low light levels. Lighting may

be used for safety and convenience but it is not necessarily uniform or continuous. After curfew, most lighting should be extinguished or reduced as activity levels decline.

LZ2: Moderate ambient lighting

Areas of human activity where the vision of human residents and users is adapted to moderate light levels. Lighting may typically be used for safety and convenience but it is not necessarily uniform or continuous. After curfew, lighting may be extinguished or reduced as activity levels decline.

LZ3: Moderately high ambient lighting

Areas of human activity where the vision of human residents and users is adapted to moderately high light levels. Lighting is generally desired for safety, security and/or convenience and it is often uniform and/or continuous. After curfew, lighting may be extinguished or reduced in most areas as activity levels decline.

LZ4: High ambient lighting

Areas of human activity where the vision of human residents and users is adapted to high light levels. Lighting is generally considered necessary for safety, security and/or convenience and it is mostly uniform and/or continuous. After curfew, lighting may be extinguished or reduced in some areas as activity levels decline.

III. GENERAL REQUIREMENTS

A. Conformance with All Applicable Codes

All outdoor lighting shall be installed in conformance with the provisions of this Ordinance, applicable Electrical and Energy Codes, and applicable sections of the Building Code.

B. Applicability

Except as described below, all outdoor lighting installed after the date of effect of this Ordinance shall comply with these requirements. This includes, but is not limited to, new lighting, replacement lighting, or any other lighting whether attached to structures, poles, the earth, or any other location, including lighting installed by any third party.

Exemptions from III.(B.) The following are not regulated by this Ordinance

- a. Lighting within the public right-of-way or easement for the principal purpose of illuminating roads and highways. No exemption shall apply to any street lighting and to any lighting within the public right of way or easement when the purpose of the luminaire is to illuminate areas outside of the public right of way or easement.
- b. Lighting for public monuments and statuary.
- c. Lighting solely for signs (lighting for signs is regulated by the Sign Ordinance).
- d. Repairs to existing luminaires not exceeding 25% of total installed luminaires.
- e. e. Temporary lighting for theatrical, television, performance areas and construction sites;
- f. Underwater lighting in swimming pools and other water features
- g. Temporary lighting and seasonal lighting provided that individual lamps are less than 10 watts and 70 lumens.
- h. Lighting that is only used under emergency conditions.
- i. In lighting zones 2, 3 and 4, low voltage landscape lighting controlled by an automatic device that is set to turn the lights off at one hour after the site is closed to the public or at a time established by the authority.

Exceptions to III. (B.) All lighting shall follow provisions in this ordinance; however, any special requirements for lighting listed in a) and b) below shall take precedence.

- a. Lighting specified or identified in a specific use permit.
- b. Lighting required by federal, state, territorial, commonwealth or provincial laws or regulations.

C. Lighting Control Requirements

1. Automatic Switching Requirements

Controls shall be provided that automatically extinguish all outdoor lighting when sufficient daylight is available using a control device or system such as a photoelectric switch, astronomic time switch or equivalent functions from a programmable lighting controller, building automation system or lighting energy management system, all with battery or similar backup power or device.

Exceptions to III.(C.) 1. Automatic lighting controls are not required for the following:

- a. Lighting under canopies.
- b. Lighting for tunnels, parking garages, garage entrances, and similar conditions.

2. Automatic Lighting Reduction Requirements

The Authority shall establish curfew time(s) after which total outdoor lighting lumens shall be reduced by at least 30% or extinguished.

Exceptions to III.(C.) 2. Lighting reductions are not required for any of the following:

- a. With the exception of landscape lighting, lighting for residential properties including multiple residential properties not having common areas.
- b. When the outdoor lighting consists of only one luminaire.
- c. Code required lighting for steps, stairs, walkways, and building entrances.
- d. When in the opinion of the Authority, lighting levels must be maintained.
- e. Motion activated lighting.
- f. Lighting governed by special use permit in which times of operation are specifically identified.
- g. Businesses that operate on a 24 hour basis.

IV. NON-RESIDENTIAL LIGHTING

For all non-residential properties, and for multiple residential properties of seven domiciles or more and having common outdoor areas, all outdoor lighting shall comply either with Part A or Part B of this section.

A. Prescriptive Method

An outdoor lighting installation complies with this section if it meets the requirements of subsections 1 and 2, below.

1. Total Site Lumen Limit

The total installed initial luminaire lumens of all outdoor lighting shall not exceed the total site lumen limit. The total site lumen limit shall be determined using either the Parking Space Method (Table A) or the Hardscape Area Method (Table B). Only one method shall be used per permit application, and for sites with existing lighting, existing lighting shall be included in the calculation of total installed lumens. The total installed initial luminaire lumens is calculated as the sum of the initial luminaire lumens for all luminaires.

2. Limits to Off Site Impacts

All luminaires shall be rated and installed according to Table C. 3. Light Shielding for Parking Lot Illumination. All parking lot lighting shall have no light emitted above 90 degrees.

Exception:

- a. Ornamental parking lighting shall be permitted by special permit only, and shall meet the requirements of Table C-1 for Backlight, Table C-2 for Uplight, and Table C-3 for Glare, without the need for external field-added modifications.

B. Performance Method

1. Total Site Lumen Limit

The total installed initial luminaire lumens of all lighting systems on the site shall not exceed the allowed total initial site lumens. The allowed total initial site lumens shall be determined using Tables D and E. For sites with existing lighting, existing lighting shall be included in the calculation of total installed lumens. The total installed initial luminaire lumens of all is calculated as the sum of the initial luminaire lumens for all luminaires.

2. Limits to Off Site Impacts

All luminaires shall be rated and installed using either Option A or Option B. Only one option may be used per permit application.

Option A: All luminaires shall be rated and installed according to Table C.

Option B: The entire outdoor lighting design shall be analyzed using industry standard lighting software including interreflections in the following manner:

- 1) Input data shall describe the lighting system including luminaire locations, mounting heights, aiming directions, and employing photometric data tested in accordance with IES guidelines. Buildings or other physical objects on the site within three object heights of the property line must be included in the calculations.
- 2) Analysis shall utilize an enclosure comprised of calculation planes with zero reflectance values around the perimeter of the site. The top of the enclosure shall be no less than 33 feet (10 meters) above the tallest luminaire. Calculations shall include total lumens upon the inside surfaces of the box top and vertical sides and maximum vertical illuminance (footcandles and/or lux) on the sides of the enclosure.

The design complies if:

- a. The total lumens on the inside surfaces of the virtual enclosure are less than 15% of the total site lumen limit; and

- b. The maximum vertical illuminance on any vertical surface is less than the allowed maximum illuminance per Table F.

V. RESIDENTIAL LIGHTING

A. General Requirements

For residential properties including multiple residential properties not having common areas, all outdoor luminaires shall be fully shielded and shall not exceed the allowed lumen output in Table G, row 2.

Exceptions

1. One partly shielded or unshielded luminaire at the main entry, not exceeding the allowed lumen output in Table G row 1.
2. Any other partly shielded or unshielded luminaires not exceeding the allowed lumen output in Table G row 3.
3. Low voltage landscape lighting aimed away from adjacent properties and not exceeding the allowed lumen output in Table G row 4.
4. Shielded directional flood lighting aimed so that direct glare is not visible from adjacent properties and not exceeding the allowed lumen output in Table G row 5.
5. Open flame gas lamps.
6. Lighting installed with a vacancy sensor, where the sensor extinguishes the lights no more than 15 minutes after the area is vacated.
7. Lighting exempt per Section III (B.).

B. Requirements for Residential Landscape Lighting

1. Shall comply with Table G.
2. Shall not be aimed onto adjacent properties.

VI. LIGHTING BY SPECIAL PERMIT ONLY

A. High Intensity and Special Purpose Lighting

The following lighting systems are prohibited from being installed or used except by special use permit:

1. Temporary lighting in which any single luminaire exceeds 20,000 initial luminaire lumens or the total lighting load exceeds 160,000 lumens.
2. Aerial Lasers.
3. Searchlights.
4. Other very intense lighting defined as having a light source exceeding 200,000 initial luminaire lumens or an intensity in any direction of more than 2,000,000 candelas.

B. Complex and Non-Conforming Uses

Upon special permit issued by the Authority, lighting not complying with the technical requirements of this ordinance but consistent with its intent may be installed for complex sites or uses or special uses including, but not limited to, the following applications:

1. Sports facilities, including but not limited to unconditioned rinks, open courts, fields, and stadiums.
2. Construction lighting.
3. Lighting for industrial sites having special requirements, such as petrochemical manufacturing or storage, shipping piers, etc.
4. Parking structures.
5. Urban parks
6. Ornamental and architectural lighting of bridges, public monuments, statuary and public buildings.
7. Theme and amusement parks.
8. Correctional facilities.

To obtain such a permit, applicants shall demonstrate that the proposed lighting installation:

- a. Has sustained every reasonable effort to mitigate the effects of light on the environment and surrounding properties, supported by a signed statement

describing the mitigation measures. Such statement shall be accompanied by the calculations required for the Performance Method.

- b. Employs lighting controls to reduce lighting at a Project Specific Curfew (“Curfew”) time to be established in the Permit.
- c. Complies with the Performance Method after Curfew.

The Authority shall review each such application. A permit may be granted if, upon review, the Authority believes that the proposed lighting will not create unwarranted glare, sky glow, or light trespass.

VII. EXISTING LIGHTING

Lighting installed prior to the effective date of this ordinance shall comply with the following.

A. Amortization

On or before [amortization date], all outdoor lighting shall comply with this Code.

B. New Uses or Structures, or Change of Use

Whenever there is a new use of a property (zoning or variance change) or the use on the property is changed, all outdoor lighting on the property shall be brought into compliance with this Ordinance before the new or changed use commences.

C. Additions or Alterations

1. Major Additions.

If a major addition occurs on a property, lighting for the entire property shall comply with the requirements of this Code. For purposes of this section, the following are considered to be major

additions:

- Additions of 25 percent or more in terms of additional dwelling units, gross floor area, seating capacity, or parking spaces, either with a single addition or with cumulative additions after the effective date of this Ordinance.
- Single or cumulative additions, modification or replacement of 25 percent or more of installed outdoor lighting luminaires existing as of the effective date of this Ordinance.

2. Minor Modifications, Additions, or New Lighting Fixtures for Non-residential and Multiple Dwellings

For non-residential and multiple dwellings, all additions, modifications, or replacement of more than 25 percent of outdoor lighting fixtures existing as of the effective date of this Ordinance shall require the submission of a complete inventory and site plan detailing all existing and any proposed new outdoor lighting.

Any new lighting shall meet the requirements of this Ordinance.

3. Resumption of Use after Abandonment

If a property with non-conforming lighting is abandoned for a period of six months or more, then all outdoor lighting shall be brought into compliance with this Ordinance before any further use of the property occurs.

VIII. ENFORCEMENT & PENALTIES

TBD

IX. TABLES

Table A - Allowed Total Initial Luminaire Lumens per Site for Non-residential Outdoor Lighting, Per Parking Space Method

May only be applied to properties up to 10 parking spaces (including handicapped accessible spaces).

| LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|---------------|---------------|---------------|---------------|-----------------|
| 350 lms/space | 490 lms/space | 630 lms/space | 840 lms/space | 1,050 lms/space |

Table B - Allowed Total Initial Lumens per Site for Nonresidential Outdoor Lighting, Hardscape Area Method

May be used for any project. When lighting intersections of site drives and public streets or road, a total of 600 square feet for each intersection may be added to the actual site hardscape area to provide for intersection lighting.

| LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|------|------|------|------|------|
|------|------|------|------|------|

| Base Allowance | | | | |
|--------------------------------|---------------------------------|--------------------------------|--------------------------------|--------------------------------|
| 0.5 lumens per SF of Hardscape | 1.25 lumens per SF of Hardscape | 2.5 lumens per SF of Hardscape | 5.0 lumens per SF of Hardscape | 7.5 lumens per SF of Hardscape |

Table B - Lumen Allowances, in Addition to Base Allowance

| | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|---|------|---|---|--|--|
| Additional allowances for sales and service facilities. No more than two additional allowances per site, Use it or Lose it. | | | | | |
| Outdoor Sales Lots. This allowance is lumens per square foot of uncovered sales lots used exclusively for the display of vehicles or other merchandise for sale, and may not include driveways, parking or other non sales areas. To use this allowance, luminaires must be within 2 mounting heights of sales lot area. | 0 | 4 lumens per square foot | 8 lumens per square foot | 16 lumens per square foot | 16 lumens per square foot |
| Outdoor Sales Frontage. This allowance is for lineal feet of sales frontage immediately adjacent to the principal viewing location(s) and unobstructed for its viewing length. A corner sales lot may include two adjacent sides provided that a different principal viewing location exists for each side. In order to use this allowance, luminaires must be located between the principal viewing location and the frontage outdoor sales area | 0 | 0 | 1,000 per LF | 1,500 per LF | 2,000 per LF |
| Drive Up Windows. In order to use this allowance, luminaires must be within 20 feet horizontal distance of the center of the window. | 0 | 2,000 lumens per drive-up window | 4,000 lumens per drive-up window | 8,000 lumens per drive-up window | 8,000 lumens per drive-up window |
| Vehicle Service Station. This allowance is lumens per installed fuel pump. | 0 | 4,000 lumens per pump (based on 5 fc horiz) | 8,000 lumens per pump (based on 5 fc horiz) | 16,000 lumens per pump (based on 5 fc horiz) | 24,000 lumens per pump (based on 5 fc horiz) |

Table C - Maximum Allowable Backlight, Uplight and Glare (BUG) Ratings

May be used for any project. A luminaire may be used if it is rated for the lighting zone of the site or lower in number for all ratings B, U and G. Luminaires equipped with adjustable mounting devices permitting alteration of luminaire aiming in the field shall not be permitted.

| TABLE C-1 | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|---|-------------|-------------|-------------|-------------|-------------|
| Allowed Backlight Rating* | | | | | |
| Greater than 2 mounting heights from property line | B1 | B3 | B4 | B5 | B5 |
| 1 to less than 2 mounting heights from property line and ideally oriented** | B1 | B2 | B3 | B4 | B4 |
| 0.5 to 1 mounting heights from property line and ideally oriented** | B0 | B1 | B2 | B3 | B3 |
| Less than 0.5 mounting height to property line and properly oriented** | B0 | B0 | B0 | B1 | B2 |

*For property lines that abut public walkways, bikeways, plazas, and parking lots, the property line may be considered to be 5 feet beyond the actual property line for purpose of determining compliance with this section. For property lines that abut public roadways and public transit corridors, the property line may be considered to be the centerline of the public roadway or public transit corridor for the purpose of determining compliance with this section. NOTE: This adjustment is relative to Table C-1 and C-3 only and shall not be used to increase the lighting area of the site.

** To be considered 'ideally oriented', the luminaire must be mounted with the backlight portion of the light output oriented perpendicular and towards the property line of concern.

Table C - 2 Maximum Allowable Uplight (BUG) Ratings – Continued

| Table C-2 | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|--|-------------|-------------|-------------|-------------|-------------|
| Allowed Uplight Rating | U0 | U1 | U2 | U3 | U4 |
| Allowed % light emission above 90° for street or Area lighting | 0% | 0% | 0% | 0% | 0% |

Table C - 3 Maximum Allowable Glare (BUG) Ratings - Continued

| Table C-3 | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|-----------------------------|-------------|-------------|-------------|-------------|-------------|
| Allowed Glare Rating | G0 | G1 | G2 | G3 | G4 |

| | | | | | |
|--|----|----|----|----|----|
| Any luminaire not ideally oriented*** with 1 to less than 2 mounting heights to any property line of concern | G0 | G0 | G1 | G1 | G2 |
| Any luminaire not ideally oriented*** with 0.5 to 1 mounting heights to any property line of concern | G0 | G0 | G0 | G1 | G1 |
| Any luminaire not ideally oriented*** with less than 0.5 mounting heights to any property line of concern | G0 | G0 | G0 | G0 | G1 |

*** Any luminaire that cannot be mounted with its backlight perpendicular to any property line within 2X the mounting heights of the luminaire location shall meet the reduced Allowed Glare Rating in Table C-3.

Table D Performance Method Allowed Total Initial Site Lumens

May be used on any project.

| | | | | | |
|------------------------------|------|-------|-------|--------|--------|
| Lighting Zone | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
| Allowed Lumens Per SF | 0.5 | 1.25 | 2.5 | 5.0 | 7.5 |
| Allowed Base Lumens Per Site | 0 | 3,500 | 7,000 | 14,000 | 21,000 |

Table E Performance Method Additional Initial Luminaire Lumen Allowances.

All of the following are “use it or lose it” allowances.

All area and distance measurements in plan view unless otherwise noted.

| | | | | | |
|---|------|-------|-------|-------|-------|
| Lighting Application | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
| Additional Lumens Allowances for All Buildings except service stations and outdoor sales facilities. A MAXIMUM OF THREE (3) ALLOWANCES ARE PERMITTED. THESE ALLOWANCES ARE “USE IT OR LOSE IT”. | | | | | |
| Building Entrances or Exits. This allowance is per door. In order to use this allowance, luminaires | 400 | 1,000 | 2,000 | 4,000 | 6,000 |

| Lighting Application | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|--|------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|
| must be within 20 feet of the door. | | | | | |
| Building Facades. This allowance is lumens per unit area of building façade that are illuminated. To use this allowance, luminaires must be aimed at the façade and capable of illuminating it without obstruction. | 0 | 0 | 8/SF | 16/SF | 24/SF |
| Sales or Non-sales Canopies. This allowance is lumens per unit area for the total area within the drip line of the canopy. In order to qualify for this allowance, luminaires must be located under the canopy. | 0 | 3/SF | 6/SF | 12/SF | 18/SF |
| Guard Stations. This allowance is lumens per unit area of guardhouse plus 2000 sf per vehicle lane. In order to use this allowance, luminaires must be within 2 mounting heights of a vehicle lane or the guardhouse. | 0 | 6/SF | 12/SF | 24/SF | 36/SF |
| Outdoor Dining. This allowance is lumens per unit area for the total illuminated hardscape of outdoor dining. In order to use this allowance, luminaires must be within 2 mounting heights of the hardscape area of outdoor dining | 0 | 1/SF | 5/SF | 10/SF | 15/SF |
| Drive Up Windows. This allowance is lumens per window. In order to use this allowance, luminaires must be within 20 feet of the center of the window. | 0 | 2,000 lumens per drive-up window | 4,000 lumens per drive-up window | 8,000 lumens per drive-up window | 8,000 lumens per drive-up window |
| Additional Lumens Allowances for Service Stations only. Service stations may not use any other additional allowances. | | | | | |
| Vehicle Service Station Hardscape. | 0 | 4/SF | 8/SF | 16/SF | 24/SF |

| Lighting Application | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|--|------|------|-------|-------|-------|
| This allowance is lumens per unit area for the total illuminated hardscape area less area of buildings, area under canopies, area off property, or areas obstructed by signs or structures. In order to use this allowance, luminaires must be illuminating the hardscape area and must not be within a building, below a canopy, beyond property lines, or obstructed by a sign or other structure. | | | | | |
| Vehicle Service Station Canopies. This allowance is lumens per unit area for the total area within the drip line of the canopy. In order to use this allowance, luminaires must be located under the canopy. | 0 | 8/SF | 16/SF | 32/SF | 32/SF |
| <p>Additional Lumens Allowances for Outdoor Sales facilities only.</p> <p>Outdoor Sales facilities may not use any other additional allowances.</p> <p>NOTICE: lighting permitted by these allowances shall employ controls extinguishing this lighting after a curfew time to be determined by the Authority.</p> | | | | | |
| Outdoor Sales Lots. This allowance is lumens per square foot of uncovered sales lots used exclusively for the display of vehicles or other merchandise for sale, and may not include driveways, parking or other non sales areas and shall not exceed 25% of the total hardscape area. To use this allowance, Luminaires must be within 2 mounting heights of the sales lot area. | 0 | 4/SF | 8/SF | 12/SF | 18/SF |

| Lighting Application | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|--|------|------|----------|--------------|--------------|
| Outdoor Sales Frontage. This allowance is for lineal feet of sales frontage immediately adjacent to the principal viewing location(s) and unobstructed for its viewing length. A corner sales lot may include two adjacent sides provided that a different principal viewing location exists for each side. In order to use this allowance, luminaires must be located between the principal viewing location and the frontage outdoor sales area. | 0 | 0 | 1,000/LF | 1,500/ LF | 2,000/ LF |

Table F Maximum Vertical Illuminance at any point in the plane of the property line

| LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|-----------------------|----------------------|----------------------|----------------------|-----------------------|
| 0.05 FC or 0.5 LUX | 0.1 FC or 1.0 LUX | 0.3 FC or 3.0 LUX | 0.8 FC or 8.0 LUX | 1.5 FC or 15.0 LUX |

Table G - Residential Lighting Limits

| Lighting Application | LZ-0 | LZ-1 | LZ-2 | LZ-3 | LZ-4 |
|---|-------------|--------------|--------------|--------------|--------------|
| Row 1 Maximum Allowed Luminaire Lumens * for Unshielded Luminaires at one entry only | Not allowed | 420 lumens | 630 lumens | 630 lumens | 630 lumens |
| Row 2 Maximum Allowed Luminaire Lumens * for each Fully Shielded Luminaire | 630 lumens | 1,260 lumens | 1,260 lumens | 1,260 lumens | 1,260 lumens |
| Row 3 Maximum Allowed Luminaire Lumens * for each Unshielded Luminaire excluding main entry | Not allowed | 315 lumens | 315 lumens | 315 lumens | 315 lumens |
| Row 4 Maximum Allowed Luminaire Lumens * for each Landscape Lighting | Not allowed | Not allowed | 1,050 lumens | 2,100 lumens | 2,100 lumens |

| | | | | | |
|---|-------------|-------------|--------------|--------------|--------------|
| Row 5 Maximum Allowed Luminaire Lumens * for each Shielded Directional Flood Lighting | Not allowed | Not allowed | 1,260 lumens | 2,100 lumens | 2,100 lumens |
| Row 6 Maximum Allowed Luminaire Lumens * for each Low Voltage Landscape Lighting | Not allowed | Not allowed | 525 lumens | 525 lumens | 525 lumens |

* Luminaire lumens equals Initial Lamp Lumens for a lamp, multiplied by the number of lamps in the luminaire.

XI. STREETLIGHT ORDINANCE

A. Preamble

The purpose of this Ordinance is to control the light pollution of street lighting, including all collectors, local streets, alleys, sidewalks and bikeways, as defined by ANSI/IES RP-8 Standard Practice for Roadway and Street Lighting and in a manner consistent with the Model Lighting Ordinance.

B. Scope

All street lighting not governed by regulations of federal, state or other superceding jurisdiction.

EXCEPTION: lighting systems mounted less than 10.5 feet above street level and having less than 1000 initial lumens each.

C. Master Lighting Plan

The Authority shall develop a Master Lighting Plan based on the American Association of State Highway and Transportation Officials (AASHTO) Roadway Lighting Design Guide GL-6, October 2005, Chapter 2. Such plan shall include, but not be limited to, the Adoption of Lighting Zones and:

1. Goals of street lighting in the jurisdiction by Lighting Zone
2. Assessment of the safety and security issues in the jurisdiction by Lighting Zone
3. Environmentally judicious use of resources by Lighting Zone
4. Energy use and efficiency by Lighting Zone

5. Curfews to reduce or extinguish lighting when no longer needed by Lighting Zone

D. Warranting

The Authority shall establish a warranting process to determine whether lighting is required. Such warranting process shall not assume the need for any lighting nor for continuous lighting unless conditions warrant the need. Lighting shall only be installed where warranted.

E. Light Shielding and Distribution

All street lighting shall have no light emitted above 90 degrees.

Exception: Ornamental street lighting for specific districts or projects shall be permitted by special permit only, and shall meet the requirements of Table H below without the need for external field-added modifications.

Table H - Uplight Control Requirements for Ornamental Street Lights - by Special Permit Only

| Lighting Zone | Maximum Uplight Rating |
|---------------|------------------------|
| LZ-0 | U-0 |
| LZ-1 | U-1 |
| LZ-2 | U-2 |
| LZ-3 | U-3 |
| LZ-4 | U-4 |
